Alternative Routes To Formal Education:

Alternative Routes to Formal Education Hilary Perraton, 1982 **Alternative Routes to Formal Education** H. D. Perraton, 1982 Alternative Routes to Formal Education World Bank. Research Committee, 1979 *Alternative Routes to Formal Education* H. D. Perraton, 1982 **Distance Education for Teacher Training** Hilary Perraton, 2002-03-11 Distance education combining the use of correspondence texts broadcasting and limited opportunities for face to face study has been used in at least a hundred teacher training programmes over the last 25 years Distance Education for Teacher Training is the first comparative review of the use of distance education and open learning for the training and upgrading of teachers The book contains case studies using a broadly common format both to describe and analyse distance teacher training programmes in eleven countries across five continents The case studies describe the methods used to examine how far the craft of teaching can be studied at a distance Using a standardised microeconomic framework they provide unique data on the comparative costs of training teachers by distance and conventional methods The authors then draw general conclusions about the advantages and drawbacks of using distance education or open learning about the conditions for success and about comparative effects and costs Distance Education for Teacher Training will be of value to all concerned with teacher education whether in developing or industrialised countries and to those working in and planning for distance education and open learning *Non-Formal Education* Alan Rogers, 2007-03-06 The Comparative Education Research Centre CERC at the University of Hong Kong is proud and privileged to present this book in its series CERC Studies in Comparative Education Alan Rogers is a distinguished figure in the field of non formal education and brings to this volume more than three decades of experience The book is a masterly account which will be seen as a milestone in the literature It is based on the one hand on an exhaustive review of the literature and on the other hand on extensive practical experience in all parts of the world It is a truly comparative work which fits admirably into the series Much of the thrust of Rogers work is an analysis not only of the significance of non formal education but also of the reasons for changing fashions in the development community Confronting a major question at the outset Rogers ask why the terminology of non formal education which was so much in vogue in the 1970s and 1980s practically disappeared from the mainstream discourse in the 1990s and initial years of the present century Much of the book is therefore about paradigms in the domain of development studies and about the ways that fashions may gloss over substance **Distance Education** David Sewart, Desmond Keegan, Borje Holmberg, 2020-07-24 Distance education for long the Cinderella of the educational spectrum had emerged in the 1970s and early 1980s as a valued component of many national educational systems in both developed and developing countries The foundation of the Open Universities developments in communications technology and in audio video and computer based learning a new sophistication in the design of print based materials and better support systems for the student learning at a distance had all contributed to the availability and quality of distance education programmes Originally published in 1988 this book

chronicles this great change in distance education It presents the best writings on the subject published during the previous ten years The articles selected for this volume provided a new scholarly basis for the theory and practice of distance education The editors have brought together contributions from many countries and present authoritative introductions to each of the nine sections This book provided those in both developed and developing countries with a guideline to one of the most rapidly expanding areas of education at the time Organizing Educational Broadcasting David Hawkrige, John Robinson, 2023-02-03 First published in 1982 Organizing Educational Broadcasting provides advice and guidance in organizational and managerial skills for those responsible for the operation of educational broadcasting systems It is principally designed for those who actually work within educational radio and television systems They are the people who perhaps stand to gain most by reading about international case studies In addition high level decision makers planners and others who are concerned with conceptualizing planning and implementing new systems or more likely modifying old ones will find much to interest them *The Costs and Economics of Open and Distance Learning* Greville (Lecturer Rumble, 2012-10-12 Dissecting in detail the arguments underlying the costs and economics of open and distance learning this text should give the reader an insight and the confidence to cost their own open and distance learning projects **Distance Teaching For Higher and Adult Education** Anthony (Tony) Kaye, Greville Rumble, 2018-12-21 Originally published in 1981 this volume provides a detailed analysis of the factors strategic pedagogic operational organisational and financial which should be taken into account in the planning and running of large scale centralised distance education systems at the higher education level The book uses evidence drawn from Open University type institutions in Canada Costa Rica Germany Iran Israel Pakistan Spain Sri Lanka Venezuela and the UK
