Philosophy and German Literature, 1700-1990 Nicholas Saul, 2002-05-02 Although the importance of the interplay of literature and philosophy in Germany has often been examined within individual works or groups of works by particular authors little research has been undertaken into the broader dialogue of German literature and philosophy as a whole *Philosophy and German Literature 1700-1990* offers six chapters by leading specialists on the dialogue between the work of German literary writers and philosophers through their works The volume shows that German literature far from being the mouthpiece of a dour philosophical culture dominated by the great names of Leibniz Kant Hegel Marx Heidegger and Habermas has much more to offer while possessing a high affinity with philosophy it explores regions of human insight and experience beyond philosophy's ken Festschrift für Achim Krämer zum 70. Wurst, 2023 Examines a variety of texts from late Enlightenment Germany to provide a nuanced rethinking of women's roles as wives mothers and housekeepers creators of the cultural spaces of the home Domesticity a set of practices emotions and values culminating in a nourishing emotional and physical ambience the feel of being at home and belonging connects one's subjective experience to the material environment In late Enlightenment Germany writers from Joachim Heinrich Campe and Theodor von Hippel to Sophie La Roche imagined the home as a space where true humanity would be realized The high stakes cultural formation of domesticity was part of a complex discourse on the pursuit of happiness as a life well lived As domesticity became a surrogate for the lost religious certainties of the vanishing pre-modern world an obsessive anxiety concerning its delineation in discourse suggested its importance but also its fragility and the consequences of its failure Karin A. Wurst examines didactic novels by female authors autobiographical texts popular philosophy advice literature periodicals pedagogical tracts and household manuals in pursuit of a nuanced rethinking of the relationship between women's roles as wives mothers and housekeepers and as creators of the cultural spaces of the home She finds that the high value imaginary of domesticity encouraged women's agency insofar as they were tasked with turning theoretical ideals into everyday practice At the same time her book shows the under-illuminated contribution of women's work to social and political change from within the patriarchal structures of eighteenth-century Germany Creatures of

Attention Johannes Wankhammer, 2024-06-15 *Creatures of Attention* excavates the early modern prehistory of our late modern crises of attention At the threshold of modernity philosophers scientists and poets across Europe began to see attention as the key to autonomous agency and knowledge Recovering the philosophical and literary works from eighteenth century Germany in which attention subject and aesthetics developed their modern meanings Johannes Wankhammer examines control over attention as the cultural technique underpinning the ideal of individual autonomy Aesthetics founded by Alexander Baumgarten as a science of sense perception challenged this ideal by reframing art as a catalyst for alternative modes of selfhood and attention While previous scholarship on the history of attention emphasized the erosion of subjectivity by industrial or technological modernization Wankhammer asks how attention came to define subjectivity in the first place When periodically recurring crises of attention threaten the coherence of the subject the subject comes undone at the very seams that first sutured it together *Creatures of Attention* offers the first systematic study of a foundational discourse on attention from 1650 to 1780 Presenting pre Kantian aesthetics as a critique of the Enlightenment paradigm of strained attention the book offers a fresh perspective on poetics and aesthetics in eighteenth century Germany *Katholische (catholische) Blätter aus Tirol. Environmental Imagination Giulia Sissa, Francesca Martelli, 2023-07-27 This book positions Ovid's *Metamorphoses* as a foundational text in the western history of environmental thought The poem is about new bodies Stones springs plants and animals materialize out of human origins to create a world of hybrid objects which retain varying degrees of human subjectivity while taking on new physical form In bending the boundaries of known categories of being these hybrid entities reveal both the porousness of human and other agencies as well as the dangers released by their fusion *Metamorphosis* unsettles the category of the human within the complex ecologies that make up the world as we know it Drawing on a range of modern environmental theorists and approaches the contributors to this volume trace how the *Metamorphoses* models the relationship between humans and other life forms in ways that resonate with the preoccupations of contemporary eco criticism They make the case for seeing the worldview depicted in Ovid's poem as an exemplar of the premodern ecological mindset that contemporary environmental thought seeks to approximate They also highlight critical moments in the history of the poem's ecological reception including reflections by a contemporary poet as well as studies of Medieval and Renaissance responses to Ovid **Hermann Weber - Yo, la peor de todas, ich, die Schlechteste von allen**, 2009

Friedrich Dürrenmatts Roman "Justiz" Bernhard Aue, 2004 **Max Weber** Joachim Radkau, 2013-10-29 Max Weber 1864-1920 is recognized throughout the world as the most important classic thinker in the social sciences there is simply no one in the history of the social sciences who has been more influential The affinity between capitalism and protestantism the religious origins of the Western world the force of charisma in religion as well as in politics the all embracing process of rationalization and the bureaucratic price of progress the role of legitimacy and of violence as offsprings of leadership the

disenchantment of the modern world together with the never ending power of religion the antagonistic relation between intellectualism and eroticism all these are key concepts which attest to the enduring fascination of Weber's thinking The tremendous influence exerted by Max Weber was due not only to the power of his ideas but also to the fact that behind his theories one perceived a man with a marked character and a tragic destiny However for nearly 80 years our understanding of the life of Max Weber was dominated by the biography published in 1926 by his widow Marianne Weber The lack of a great Weber biography was one of the strangest and most glaring gaps in the literature of the social sciences For various reasons the task was difficult time and again attempts to write a new biography of Max Weber ended in failure When Joachim Radkau's biography appeared in Germany in 2005 it caused a sensation Based on an abundance of previously unknown sources and richly embedded in the German history of the time this is the first fully comprehensive biography of Max Weber ever to appear Radkau brings out in a way that no one has ever done before the intimate interrelations between Weber's thought and his life experience He presents detailed revelations about the great enigmas of Weber's life his suffering and erotic experiences his fears and his desires his creative power and his methods of work as well as his religious experience and his relation to nature and to death By understanding the great drama of his life we discover a new Max Weber until now unknown in many respects and at the same time we gain a new appreciation of his work Joachim Radkau born in 1943 is Professor of Modern History at the Bielefeld University Germany His interest in Max Weber dates back nearly forty years when he worked together with the German American historian George W F Hallgarten Washington a refugee who left Germany in 1933 and who as a student listened to Weber's last lecture in summer 1920 Radkau's main works include Die deutsche Emigration in den USA 1971 Deutsche Industrie und Politik together with G W F Hallgarten 1974 Aufstieg und Krise der deutschen Atomwirtschaft 1983 Technik in Deutschland 1989 Das Zeitalter der Nervosität 1998 Natur und Macht Eine Weltgeschichte der Umwelt 2000
