

The Project Approach

- Teaching strategies based on “projects” – thorough investigations of topics of interest by individuals or small/large groups;
- Key theorists – Katz and Chard;
- The approach chimes with the constructivist philosophy (knowledge is built from within and is created by learners);
- Promotion of holistic development: projects facilitate “learning by doing,” thus stimulating physical and cognitive development, and children can improve their social skills and emotional development by engaging in peer collaboration (Helm & Katz, 2016, p. 2).
