Brazil Equitable Competitive Sustainable:

Brazil, 2003 This volume presents a set of policy notes prepared by the World Bank's Brazil Team with partners during 2002 Brazil Banco Mundial, 2003 Brazil, 2003 **Brazil Country Program Evaluation, FY2004-11** The World Bank, 2014-11-04 Over 2004-11 the World Bank Group program in Brazil aimed to support to government in achieving greater equity sustainability and competitiveness IEG judges the outcome of the Bank Group program as moderately satisfactory with some important variability across themes **From Inside Brazil** Vinod Thomas, 2006 Brazil faces important issues as to whether and how socio economic and political reforms will be pursued with urgency and staying power This book presents a strong agenda and action plan to achieve for Brazil both economic growth and improved welfare for its citizens *Bounded Rationality and Policy Diffusion* Kurt Weyland, 2009-02-09 Why do very different countries often emulate the same policy model Two years after Ronald Reagan's income tax simplification of 1986 Brazil adopted a similar reform even though it threatened to exacerbate income disparity and jeopardize state revenues And Chile's pension privatization of the early 1980s has spread throughout Latin America and beyond even though many poor countries that have privatized their social security systems including Bolivia and El Salvador lack some of the preconditions necessary to do so successfully In a major step beyond conventional rational choice accounts of policy decision making this book demonstrates that bounded not full rationality drives the spread of innovations across countries When seeking solutions to domestic problems decision makers often consider foreign models sometimes promoted by development institutions like the World Bank But as Kurt Weyland argues policymakers apply inferential shortcuts at the risk of distortions and biases Through an in depth analysis of pension and health reform in Bolivia Brazil Costa Rica El Salvador and Peru Weyland demonstrates that decision makers are captivated by neat bold cognitively available models And rather than thoroughly assessing the costs and benefits of external models they draw excessively firm conclusions from limited data and overextrapolate from spurts of success or failure Indications of initial success can thus trigger an upsurge of policy diffusion **OECD Economic Surveys: Brazil 2005** OECD, 2005-03-01 This second OECD Economic Survey of Brazil makes a detailed examination of macroeconomic policies financial markets the regulatory framework and social policies and expenditure *Entering the Brazilian Market: A Guide for LEAN Consultants* Kristina Erikson, 2009-11 Especially during the last two decades consulting companies established themselves in the international marketplace In times of globalization particularly emerging economies such as Brazil are experiencing an upward trend and join the global players The term LEAN consulting became frequently used in this context and plays a major role in the Brazilian consulting market nowadays This study develops recommendations for the market entry of management consulting companies into the Brazilian market The implication of the term Lean in the context of the consulting business and its future potential in Brazil is examined supported by an evaluation of the target market The outcome of the theoretical part is then being compared with empirical findings which are conducted via a Delphi Study The

empirical part clearly identifies that the most promising strategy for doing business in Brazil is intensive networking and new ventures should enter the market only with professional support from Brazilian partners who are more familiar with the peculiarities of the market. These and other interesting facts are delivered at the end of the study providing a guide for new potential consulting businesses that want to enter the Brazilian LEAN market.

Financial Sustainability of Local Governments in Southern Africa Nirmala Dorasamy, Tonderai Kapesa, 2024-09-09 This book delves into the critical issue of ensuring the long term financial viability of local governments in the diverse region of Southern Africa. Across Southern Africa, cities and communities are facing a multitude of challenges from rapid urbanization and infrastructure challenges to social inequality and environmental degradation. In this thought provoking book, the authors explore the intricate relationship between financial sustainability and the pursuit of sustainable cities and communities through different lenses. Drawing on extensive research and case studies from various countries in the region, this book provides a comprehensive analysis of the financial realities faced by local governments. It examines the factors influencing revenue generation, expenditure management, and fiscal governance, shedding light on the complexities of financial decision making in the context of limited resources and pressing development needs. Furthermore, it offers practical insights and actionable recommendations for policymakers, practitioners, and academics. It explores innovative approaches to revenue diversification, efficient expenditure allocation, and effective fiscal management, with the ultimate aim of fostering sustainable development, social services delivery, and environmentally sustainable infrastructure in Southern African cities and communities. This is an essential resource for anyone interested in understanding the challenges and opportunities associated with financial sustainability in the context of urbanisation and sustainable development in greater Africa. It serves as a guide and inspiration for building financially resilient local governments that can support the aspirations and well being of their citizens while contributing to the broader vision of sustainable cities and communities.

The Education of Nations Stephen Kosack, 2012-08-16 What causes a government to invest or not invest in poor citizens, especially mass education? In *The Education of Nations*, Stephen Kosack focuses on three radically different developing countries whose developmental trajectories bear little resemblance to each other: Brazil, Ghana, and Taiwan, and offers an elegant and pragmatic answer to this crucially important question. Quite simply, the level of investment in mass education is the product of one of two simple conditions: one political and one economic. The first condition is the nature and success of political entrepreneurs at organizing the poor politically; the second is the flexibility of the labor market faced by employers who need skilled workers. Drawing from a half century of evidence, he has found that irrespective of every other factor, these two conditions alone explain whether education is available to the poor or restricted to elites, as well as many of the key features of education systems. An empirically rich and theoretically novel study, *The Education of Nations* will change how we think about the developing world's approach to education and development.
