Sudia, 1971 Focus on Single-Parent Families Annice Yarber, Paul M. Sharp, 2010-02-26 A groundbreaking collection of writings on the growing phenomenon of single parent families in the United States and how it impacts society as a whole Focus on Single Parent Families Past Present and Future brings together in one volume a range of cutting edge research articles and essays on what has become the most dynamic change in family structure in U S history It is the only resource to make the most insightful and important work being done on the single parent family phenomena accessible to general readers Focus on Single Parent Families helps readers go beyond the stereotypes and look closely at the complexity of families with one parent and consider their place in society It encompasses the wide variety of households with a single parent a family structure that promises to continue to grow and diversify Throughout the book gauges the impact of the increasing number of single parent families on the nation as a whole particularly in regard to policies concerning family welfare children's services and health care schools and other essential social institutions **Families Without Fathers** David Popenoe, 2011-12-31 The American family is changing Divorce single parents and stepfamilies are redefining the ways we live together and raise our children Many experts feel these seemingly inevitable changes should be celebrated they claim that the new families which often lack a strong father are actually healthier than traditional two parent families or at the very least do children no harm But as David Popenoe shows in *Families Without Fathers* this optimistic view is severely misguided Examining evidence from social and behavioral science history and evolutionary biology Popenoe shows why fathers today are deserting their families in record numbers The disintegration of the child centered two parent family especially in the inner cities where as many as two in three children are growing up without their fathers and the weakening commitment of fathers to their children that more and more follows

divorce are central causes of many of our worst individual and social problems Juvenile delinquency drug and alcohol abuse teenage pregnancy welfare dependency and child poverty can be directly traced to fathers lack of involvement in their children s lives Our situation will only get worse Popenoe warns unless men are willing to renew their commitment to their marriages and to their children Yet he is not just an alarmist He suggests concrete policies and new ways of thinking and acting that will help all fathers improve their marriages and family lives and tells us what we as individuals and as a society can do to support and strengthen the most important thing a man can do *Bureau Publication (United States.
