Guy Grannum

Ancestors The Origins Of The People And Countries Of Europe:

Ancestors Martin Berg, Miles Litvinoff, 1992 The story of Europe's people from the earliest humans to modern Europeans Part 1 deals with the prehistory and early civilizations Part 2 describes 64 early peoples including Angles Britons Celts Franks Goths Iberians Saxons Romans Normans and Vikings It explains who they were where they came from and what happened to them *The History of the Ancient Britons and Their Descendants* Thomas Watkins Powell, 1882 [Tracing Your Baltic, Scandinavian, Eastern European, & Middle Eastern Ancestry Online](#) Anne Hart, 2005-06-06 Are you online and ready for global smart card and database genealogy for virtual travelers Here's how to search family history for nations bordering the Baltic Sea the Balkans countries Scandinavia Eastern Europe and the Middle East The nations listed in this guide all faiths include Finland Sweden Norway Denmark Iceland Estonia Latvia Lithuania Poland Armenia Assyria Greece Lebanon Syria and many other lands in the Middle East the Balkans Croatia Macedonia Bulgaria Eastern Europe Hungary and more Collecting details about people is moving toward smart card technology and its offspring The new wave in genealogy is authentication technology Authentication begins with new wave technology used to gather population registers Compare the new technology to the old method of door to door census taking tombstone tracings and city directory publishing No genealogists are not using smart cards this year but smart card technology is being used to compile population registers in Europe The future holds a new wave of technology used for authentication for banking transactions being applied to other areas Currently this technology is used for collecting details for population registrars such as census taking The application for research is of interest to family historians librarians and governments It's already in use by private industry for electronic authentication Family history is now about intelligent connections whether it's a population registrar census detail or electronic identity for banking Smart card genealogy began in 1998 in Finland with governments seeking to put census and population registers in an electronic form that would be available to researchers and these applications are going global **The Handbook of Cross-Border Ethnic and Religious Affinities** Charity Butcher, 2019-04-16 Increasingly ethnic and religious variables are taken into account to explain conflict and relations between nations However ethnic and religious groups exist beyond the confines of frontiers In Africa for example hundreds of ethnic groups were divided by colonial borders and many retained kinship connections to their brethren in other countries thus creating cross border ethnic religious affinity Such cross border connections affect a variety of foreign policy from diplomacy to the use of force An internal problem can spread to other states or external actors can become involved in domestic disputes due to such factors Therefore data on cross border connections are essential to measure and assess their actual or potential effects on foreign policy or conflict This unique resource serves both qualitative and quantitative researchers For ease of use it is divided in sections for each region of world with the entries organized by pairs of contiguous countries Each entry for a pair of countries briefly discusses the ethnic and religious groups that are common to both countries and the historical and current

connections between these groups The entries are organized based on the Correlates of War country codes which are widely used by researchers and allow for country pairs to be organized geographically within each section to facilitate easy use of the data
