Spirit of the Earth CARLTON BOOKS, Vivianne Crowley, Christopher Crowley, 2004 Covering beliefs from the Americas to the Antipodes and from the Stone Age to the present day this fascinating volume explores the philosophy that underpins each belief system and explains their relevance to us in the new Millennium Spirit of the Earth Vivianne Crowley, 2004

**A Comparison of World Religions** Mary M. Saurer, 2005-11-22 Human beings have inhabited the world for millions of years and the oldest religious art found in caves and on bones dates as far back as 30 000 years From earliest times and still today people share their ideas and form a group with others who have drawn similar conclusions about the meaning of life and the ultimate reality They might call their group a religion others might call it a cult But the name they give to their concept of God does not mean that they worship a different god only that they hold a different concept of the Source and Power of that which was is and always will be Every religion serves as a way of life an opportunity to practice ones accepted beliefs and a way to socialize with those who hold similar views Religions can be dictated but beliefs cannot They are private and unique to the individual It is ones own experience with that which he or she perceives as God that prompts the acceptance of a belief system quiet endurance when there seems to be no choice or the withdrawal from religion altogether Public and personal wars have been fought in the name of righteous indignation in support of different belief systems that came from efforts to answer the questions of life Many individuals have lived lives of frustration and confusion as a result of the commonly accepted belief system of the culture into which they were born In this study we look briefly at the historical and geographical conditions related to the emergence of specific religious views and the situation of the people whose lives are influenced by them Our intent is not to determine which religion is right or wrong Using a comparison point chart we examine the basic premises of each belief system and how the holding of a premise impacts the lives of those who live it as if it were true Belief Systems and Durable Inequalities Karla Ruth Hoff, Priyanka Pandey, 2004

**The SAGE Encyclopedia of Alcohol** Scott C. Martin, 2014-12-16 Alcohol consumption goes to the very roots of nearly all human societies Different countries and regions have become associated with different sorts of alcohol for instance the beer culture of Germany the wine culture of France Japan and saki Russia and vodka the Caribbean and rum or the moonshine culture of Appalachia Wine is used in religious rituals and toasts are used to seal business deals or to celebrate marriages and state dinners However our relation with alcohol is one of love hate We also regulate it and tax it we pass laws about when and where it s appropriate we crack down severely on drunk driving and the United States and other countries tried the failed Noble Experiment of Prohibition While there are many encyclopedias on alcohol nearly all approach it as a substance of abuse taking a clinical medical perspective alcohol

alcoholism and treatment The SAGE Encyclopedia of Alcohol examines the history of alcohol worldwide and goes beyond the historical lens to examine alcohol as a cultural and social phenomenon as well both for good and for ill from the earliest days of humankind

Brainmaker Sukanto Bhattacharya,2025-11-17 In Brainmaker Sukanto Bhattacharya examines the co evolution of human and synthetic intelligence from a socio anthropological perspective He begins by presenting a history of technology discovery and adoption by human society underpinning the uniqueness of synthetic intelligence In subsequent chapters he critically comments on the challenging facets of human AI co evolution exacerbated by proliferating AI labelled gadgets Bhattacharya identifies indicators signalling that the human AI co evolutionary trajectory is about to or has already hit a turbulent patch with unknown and likely undesirable outcomes He highlights the need for a new more holistic ontological framework to cast intelligence biological and artificial as something more than a mere collation of cognitive capabilities In the final chapter he posits a few controversial conjectures on human AI co evolution
