And The Wolf Finally Came:

And the Wolf Finally Came John P. Hoerr, 1988-01-01 Traces the history of the American steel industry analyzes labor relations and explains the factors that have brought down the industry And the Wolf Finally Came John Hoerr, 2014-07-22 Choice 1988 Outstanding Academic Book Named one of the Best Business Books of 1988 by USA Today A veteran reporter of American labor analyzes the spectacular and tragic collapse of the steel industry in the 1980s John Hoerr's account of these events stretches from the industrywide bargaining failures of 1982 to the crippling work stoppage at USX U S Steel in 1986-87 He interviewed scores of steelworkers company managers at all levels and union officials and was present at many of the crucial events he describes Using historical flashbacks to the origins of the steel industry particularly in the Monongahela Valley of southwestern Pennsylvania he shows how an obsolete and adversarial relationship between management and labor made it impossible for the industry to adapt to shattering changes in the global economy **Striking Steel** Jack Metzgar, 2011-01-19 Having come of age during a period of vibrant union centered activism Jack Metzgar begins this book wondering how his father a U S Steel shop steward in the 1950s and 60s and so many contemporary historians could forget what this country owes to the union movement Combining personal memoir and historical narrative Striking Steel argues for reassessment of unionism in American life during the second half of the twentieth century and a recasting of official memory As he traces the history of union steelworkers after World War II Metzgar draws on his father's powerful stories about the publishing work in the mills stories in which time is divided between before the union and since His father Johnny Metzgar fought ardently for workplace rules as a means of giving the men some control over their working conditions and protection from venal foremen He pursued grievances until he eroded management's authority and he badgered foremen until he established shop floor practices that would become part of the next negotiated contract As a passionate advocate of solidarity he urged coworkers to stick together so that the rules were upheld and everyone could earn a decent wage Striking Steel's pivotal event is the four month nationwide steel strike of 1959 a landmark union victory that has been all but erased from public memory With remarkable tenacity union members held out for the shop floor rules that gave them dignity in the workplace and raised their standard of living Their victory underscored the value of sticking together and reinforced their sense that they were contributing to a general improvement in American working and living conditions The Metzgar family's story vividly illustrates the larger narrative of how unionism lifted the fortunes and prospects of working class families It also offers an account of how the broad social changes of the period helped to shift the balance of power in a conflict ridden patriarchal household Even if the optimism of his generation faded in the upheavals of the 1960s Johnny Metzgar's commitment to his union and the strike itself stands as an honorable example of what a collective action can and did achieve Jack Metzgar's Striking Steel is a stirring call to remember and renew the struggle *U.S. Steel and Gary, West Virginia* Ronald G. Garay, 2011-02-28 This book is well written and meticulously documented it will add significantly to the available

literature on West Virginia's industrial and community history. It should find a receptive audience among college and post graduate scholars of industrial and labor history, West Virginia history and Appalachian studies. John Lilly, editor, *Goldenseal*. The company owned the houses. It owned the stores. It provided medical and governmental services. It provided practically all the jobs. Gary, West Virginia, a coal mining town in the southern part of the state, was a creation of U.S. Steel. And while the workers were not formally bound to the company, their fortunes like that of their community were inextricably tied to the success of U.S. Steel. Gary developed in the early twentieth century as U.S. Steel sought a new supply of raw material for its industrial operations. The rich Pocahontas coal field in remote southern West Virginia provided the carbon-rich, low-sulfur coal the company required. To house the thousands of workers, it would import to mine that coal bed, U.S. Steel carved a town out of the mountain wilderness. The company was the sole reason for its existence. In this fascinating book, Ronald Garay tells the story of how industry altering decisions made by U.S. Steel executives reverberated in the hollows of Appalachia. From the area's industrial revolution in the early twentieth century to the peak of steel making activity in the 1940s to the industry's decline in the 1970s, U.S. Steel and Gary, West Virginia, offers an illuminating example of how coal and steel paternalism shaped the eastern mountain region and the limited ways communities and their economies evolve. In telling the story of Gary, this volume freshly illuminates the stories of other mining towns throughout Appalachia. At once a work of passionate journalism and a cogent analysis of economic development in Appalachia, this work is a significant contribution to the scholarship on U.S. business history, labor history, and Appalachian studies. Ronald Garay, a professor emeritus of mass communication at Louisiana State University, is the author of *Gordon McLendon: The Maverick of Radio* and *The Manship School: A History of Journalism Education at LSU*. Rocking the Boat Brigid O'Farrell, 1996. *Rocking the Boat* is a celebration of strong committed women who helped to build the American labor movement. Through the stories of eleven women from a wide range of backgrounds, we experience the turmoil, hardships, and accomplishments of thousands of other union women activists through the period spanning the Great Depression, the New Deal, World War II, the McCarthy era, the civil rights movement, and the women's movement. These women tell powerful stories that highlight and detail women's many roles as workers, trade unionists, and family members. They all faced difficulties in their personal lives, overcame challenges in their unions, and individually and collectively helped improve women's everyday working lives. Maida Springer Kemp came from New York City's Harlem Local 22 of the International Ladies Garment Workers Union to represent the AFL-CIO in Africa. In Chicago, Alice Peurala fought for her job in the steel mill and her place in the steel workers union. Jessie De La Cruz organized farm workers in California. Esther Peterson, organizer, educator, and lobbyist, became an advisor to four U.S. presidents. In chapters based on oral history interviews, these women and others provide new perspectives and practical advice for today's working women. They share an idealistic and practical commitment to the labor movement. As Dorothy Haener of the United Auto Workers and a founding member of the National Organization of Women said, "You have to take a

look at how to rock the boat You don t want to spill yourself out if you can avoid it but sometimes you have to rock the boat From these women we too learn how to rock the boat **The Steelworkers' Retirement Security System** Glenn Beamer,2016-05-12 The Steelworkers Retirement Security System A Worker based Model for Community Investment articulates a new model for economic security based upon steelworkers pension provisions and labor politics after World War II Labor s collective bargaining agreements created interdependent commitments that sustained jobs and stabilized communities The evidence in The Steelworkers Retirement Security System includes an empirical analysis of United States steel towns and case studies of Weirton West Virginia Bethlehem Pennsylvania and Johnstown Pennsylvania By understanding the politics that bound firms and workers together and adapting these commitments to the post industrial economy The Steelworkers Retirement Security System offers a new means by which communities can provide workers security and economic growth This new model the Guaranteed Pension and Community Investment plan provide workers with lifetime retirement annuities and communities with reliable investment capital **Exit Zero** Christine J. Walley,2022-12-22 Winner of CLR James Book Prize from the Working Class Studies Association and 2nd Place for the Victor Turner Prize in Ethnographic Writing In 1980 Christine J Walley s world was turned upside down when the steel mill in Southeast Chicago where her father worked abruptly closed In the ensuing years ninety thousand other area residents would also lose their jobs in the mills just one example of the vast scale of deindustrialization occurring across the United States The disruption of this event propelled Walley into a career as a cultural anthropologist and now in Exit Zero she brings her anthropological perspective home examining the fate of her family and that of blue collar America at large Interweaving personal narratives and family photos with a nuanced assessment of the social impacts of deindustrialization Exit Zero is one part memoir and one part ethnography providing a much needed female and familial perspective on cultures of labor and their decline Through vivid accounts of her family s struggles and her own upward mobility Walley reveals the social landscapes of America s industrial fallout navigating complex tensions among class labor economy and environment Unsatisfied with the notion that her family s turmoil was inevitable in the ever forward progress of the United States she provides a fresh and important counternarrative that gives a new voice to the many Americans whose distress resulting from deindustrialization has too often been ignored This book is part of a project that also includes a documentary film

Unfinished Business Judith Hamera,2017-10-02 How does structural economic change look and feel How are such changes normalized Who represents hope Who are the cautionary tales Unfinished Business argues that U S deindustrialization cannot be understood apart from issues of race and specifically apart from images of and works by and about African Americans that represent or resist normative or aberrant relationships to work and capital in transitional times It insists that Michael Jackson s performances and coverage of his life plays featuring Detroit plans for the city s postindustrial revitalization and Detroit installations The Heidelberg Project and Mobile Homestead have something valuable

to teach us about three decades of structural economic transition in the U S particularly about the changing nature of work and capitalism between the mid 1980s and 2016 Jackson and Detroit offer examples of the racialization of deindustrialization how it operates as a structure of feeling and as representations as well as a shift in the dominant mode of production and how industrialization s successor mode financialization uses imagery both very similar to and very different from its predecessor

Steel and Steelworkers John Hinshaw, 2012-02-01 Steel and Steelworkers is a fascinating account of the forces that shaped Pittsburgh big business and labor through the city s rapid industrialization in the mid nineteenth century its lengthy era of industrial maturity its precipitous deindustrialization toward the end of the twentieth century and its reinvention from hell with the lid off to America s most livable post industrial city Hinshaw examined a wide variety of company union and government documents oral histories and newspapers to reconstruct the steel industry and the efforts of labor business and government to refashion it A compelling report of industrialization and deindustrialization in which questions of organization power and politics prove as important as economics Steel and Steelworkers shows the ways in which big business and labor helped determine the fate of steel and Pittsburgh
