Algebro Geometric Quasi Periodic Finite Gap Solutions Of The Toda And Kac Van Moerbeke Hierarchies:

Algebro-Geometric Quasi-Periodic Finite-Gap Solutions of the Toda and Kac-van Moerbeke Hierarchies Wolfgang Bulla,1998 In this work the authors provide a self contained discussion of all real valued quasi periodic finite gap solutions of the Toda and Kac van Moerbeke hierarchies of completely integrable evolution equations The approach utilizes algebro geometric methods factorization techniques for finite difference expressions as well as Miura type transformations Detailed spectral theoretic properties of Lax pairs and theta function representations of the solutions are derived Features Simple and unified treatment of the topic Self contained development Novel results for the Kac van Moerbeke hierarchy and its algebro geometric solutions

Algebro-Geometric Quasi-Periodic Finite-Gap Solutions of the Toda and Kac-Van Moerbeke Hierarchies Wolfgang Bulla,F Gesztesy,H Holden,2014-09-11 In this work the authors provide a self contained discussion of all real valued quasi periodic finite gap solutions of the Toda and Kac van Moerbeke hierarchies of completely integrable evolution equations The approach utilizes algebro geometric methods factorization techniques for finite difference expressions as well as Miura type transformations Detailed spectral theoretic properties of Lax pairs and theta function representations of the solutions are derived

Spectral Analysis, Differential Equations and Mathematical Physics: A Festschrift in Honor of Fritz Gesztesy's 60th Birthday Helge Holden,Barry Simon,Gerald Teschl,2013-07-08 This volume contains twenty contributions in the area of mathematical physics where Fritz Gesztesy made profound contributions There are three survey papers in spectral theory differential equations and mathematical physics which highlight in particu

Operator Theory, Analysis and Mathematical Physics Jan Janas,Pavel Kurasov,A. Laptev,Sergei Naboko,Günter Stolz,2007-04-29 This volume contains lectures delivered at the International Conference Operator Theory and its Applications in Mathematical Physics OTAMP 2004 held at the Mathematical Research and Conference Center in Bedlewo near Poznan Poland The idea behind these lectures was to present interesting ramifications of operator methods in current research of mathematical physics

Rational Curves on Quasi-Projective Surfaces Seán Keel, James McKernan, 1999 This book is intended for graduate students and research mathematicians working in algebraic geometry

Estimating the Error of Numerical Solutions of Systems of Reaction-Diffusion Equations Donald J. Estep, Mats G. Larson, Roy D. Williams, 2000 This paper is concerned with the computational estimation of the error of numerical solutions of potentially degenerate reaction diffusion equations The underlying motivation is a desire to compute accurate estimates as opposed to deriving inaccurate analytic upper bounds In this paper we outline analyze and test an approach to obtain computational error estimates based on the introduction of the residual error of the numerical solution and in which the effects of the accumulation of errors are estimated computationally We begin by deriving an a posteriori relationship between the error of a numerical solution and its residual error using a variational argument This leads to the introduction of stability factors which measure the sensitivity of solutions to various kinds of perturbations Next we perform some general analysis on the residual errors and stability factors to determine when they are defined and to bound their size Then we describe the practical use of the theory to estimate the errors of numerical solutions computationally Several key issues arise in the implementation that remain unresolved and we present partial results and numerical experiments about these points We use this approach to estimate the error of numerical solutions of nine standard reaction diffusion models and make a systematic comparison of the time scale over which accurate numerical solutions can be computed for these problems We also perform a numerical test of the accuracy and reliability of the computational error estimate using the bistable equation Finally we apply the general theory to the class of problems that admit invariant regions for the solutions which includes seven of the main examples Under this additional stability assumption we obtain a convergence result in the form of an upper bound on the error from the a posteriori error estimate We conclude by discussing the preservation of invariant regions under discretization

Jacobi Operators and Completely Integrable Nonlinear Lattices Gerald Teschl, 2000 This volume serves as an introduction and reference source on spectral and inverse theory of Jacobi operators and applications of these theories to the Toda and Kac van Moerbeke hierarchy

Almost Automorphic and Almost Periodic Dynamics in Skew-Product Semiflows Wenxian Shen, Yingfei Yi, 1998 This volume is devoted to the study of almost automorphic dynamics in differential equations By making use of techniques from abstract topological dynamics it is shown that almost automorphy a notion which was introduced by S Bochner in 1955 is essential and fundamental in the qualitative study of almost periodic differential equations
