Alienation Of Church Wealth In Mexico:

Alienation of Church Wealth in Mexico Jan Bazant, 2008-10-30 Conflict between the Roman Catholic Church and the State in Mexico became prominent soon after independence in 1821 and during the next three decades national and state governments made various attempts to reduce ecclesiastical influence in the social economic and political life of the nation Few of such efforts met with much success and it was not until 1856 that a major reform was initiated Legislation was issued which affected all spheres of clerical activity but the most vital and controversial aspect of the reform involved the measures adopted to dispossess the Church of its wealth The extensive ecclesiastical holdings of urban and rural real estate and capital were nationalized and redistributed Professor Bazant examines earlier attempts at nationalization and describes in detail the implementations of the 1856 Lerdo Law and subsequent decrees Using selected areas of the country he traces the precise effects of the redistribution of Church property and capital describing the terms of sale or transfer the number of sales the buyers their nationality and occupation and the total value of the amounts involved [An Economic History of Mexico](#)

Richard J Salvucci, 2025-02-18 After a turbulent modern history of conquest and colonialism Mexico has developed as an economy that may be emerging but still displays significant levels of poverty particularly in relation to its neighbor to the north the United States Drawing on archival data decades of new Mexican historiography and considering issues of political economy this book explores how Mexico ended up in the relative economic position that it did Beginning with Hern n Cort s and the invention of the Conquest of New Spain it explores the economic history of Mexico through the lens of political economy incorporating environment and demography politics and power and industrialization and inequality The aftermath of the Conquest brought about a complete restructuring of the economy as a result of death from disease the introduction of European style agriculture and a more intensive exploitation of the peasantry The eighteenth and nineteenth centuries saw reform followed by a series of crises and rebellions under which sustained economic growth was impossible Globalization and the expansion of agricultural exports provided some opportunities in the late nineteenth and twentieth centuries but they failed to provide the booming rural population with a sustainable means of supporting domestic demand The so called Mexican Miracle the period of rapid growth in the 1950s 1960s and early 1970s disguised a failure to address the economic inequality embedded since the colonial period As this book clearly demonstrates this inequality was sometimes challenged in Mexican history but never decisively addressed let alone reversed This accessible and engaging book is vital reading for students and scholars of the history of Mexico and Latin America and those interested in economic development in historical perspective **Mexico since Independence** Leslie Bethell, 1991-09-27 Mexico Since Independence brings together six chapters from Volumes III V and VII of the Cambridge History of Latin America to provide in a single volume an economic social and political history of Mexico since independence from Spain in 1821 This it is hoped will be useful for both teachers and students of Latin American history Each chapter is accompanied by a bibliographical essay *The History of Mexico* J.

Forging Mexico, 1821-1835 Timothy E. Anna,2001-09-01 No struggle has been more contentious or of longer duration in Mexican national history than that between a centripetal power in the capital and the centrifugal federalism of the Mexican states Much as they do in the United States such tensions still endure in Mexico despite the centralising effect of the Mexican Revolution of 1910 20 Timothy E Anna turns his attention upon the crucial postindependence period of 1821 35 to understand both the theoretical and the practical causes of the development of this polarity He attempts to determine how much influence can be ascribed to such causes as the model of the United States the effect of European thinkers and the shifting self interest of various leaders and groups in Mexican society The result is a nuanced and thoughtful analysis of the development of one of the defining characteristics of the Mexican nation regional power and sovereignty of the state Forging Mexico 1821 1835 is a study both of the political history of the first republic and of the struggle to forge nationhood Timothy E Anna is Distinguished Professor of History at the University of Manitoba His books include The Fall of the Royal Government in Mexico City and The Mexican Empire of Iturbide
