All About Antwerp

Richard Bailey

All About Antwerp:

High Germans in the Low Countries Donald Harreld, 2004-11-01 This volume looks at the South German merchant community during Antwerp's Golden Age by examining German involvement in the social life of the city as well as by tracing merchants' commercial activities. The first section of the book considers the institutions of trade and the role Germans played in their development and how Germans interacted with other foreign merchant communities. The second section takes a wider view by tracing the commercial networks that South German merchants operated in and by quantifying South German participation in Antwerp's foreign trade. The Official Railway Guide, 1876 The National Geographic Magazine, 1914

Indexes kept up to date with supplements *The Rise of the Amsterdam Market and Information Exchange* Clé Lesger, 2016-12-05 Most scholars agree that during the sixteenth century the centre of European international trade shifted from Antwerp to Amsterdam presaging the economic rise of the Dutch Republic in the following century. Traditionally this shift has been accepted as the natural consequence of a dynamic and progressive city such as Amsterdam taking advantage of expanding commercial opportunities at the expense of a more conservative rival hampered by outmoded medieval practices. Yet whilst this theory is widely accepted is it accurate? In this groundbreaking study Clé Lesger argues that the shift of commercial power from Antwerp to Amsterdam was by no means inevitable and that the highly specialized economy of the Low Countries was more than capable of adapting to the changing needs of international trade. It was only when the Dutch Revolt and military campaigns literally divided the Low Countries into separate states that the existing stable spatial economy and port system fell apart and a restructuring was needed. Within this process of restructuring the port of Amsterdam acquired a function radically different to the one it had prior to the division of the Netherlands. Before the Revolt it had served as the northern outpost in a gateway system centred on Antwerp but with access of that port now denied to the new republic Amsterdam developed as the main centre for Dutch shipping trade and crucially the exchange of information. Drawing on a wide variety of neglected archival collections including those of the Bank of Amsterdam this study not only addresses specific historical questions concerning the commercial life of the Low Countries but through the case study of Amsterdam also explores wider issues of early modern European commercial trade and economic development.

Trade, Migration and Urban Networks in Port Cities, C. 1640-1940 Adrian Jarvis, W. Robert Lee, 2008 This study offers an exploration of the role of merchants throughout maritime history through the analysis of maritime trade networks It attempts to fill in the gaps in the historiography to determine the range of activities that maritime merchants undertook It is comprised of nine chapters one introductory and eight exploring aspects of merchant history across Europe during the period 1640 to 1940 Several major themes recur throughout these studies the necessity of port networks the extension of trade networks through merchant migration and in migration the assimilation of merchants into port communities and the impact of urban governance and trade associations on merchant activity It concludes by claiming merchants across Europe had a more common with one another when approaching risk management than has previously been assumed and that the at the core of the merchant's risk management strategy the question of who they could trust with their trade is a universally unifying factor It suggests that further research on the demographics of ports is the necessary next step in merchant historiography
