Robert Dawson

Apollo 11 First Moon Landing:

The First Men on the Moon David M. Harland, 2007-10-14 On 12 April 1961 Yuri Gagarin became the first man to orbit the Earth One month later President John F Kennedy challenged the American nation to land a man on the Moon before the decade was out On 16 July 1969 Neil Armstrong Michael Collins and Buzz Aldrin set off in Apollo 11 to attempt this audacious mission and succeeded magnificently This book tells the story of Apollo 11 starting with crew selection and training the choice of the landing site and the assembly of the space vehicle then a detailed account of the mission featuring the lunar landing and moonwalk and a review of how our knowledge of the Moon s history was revolutionised as a result The story is enlivened by dialogue between the astronauts in space and the flight controllers in Mission Control *Apollo 11* Michael D. Cole, 1995 One of the most exciting events in space history the first moon landing as seen through the eyes of the three Apollo astronauts Neil A Armstrong Edwin Buzz E Aldrin and Michael Collins This book describes the details of the first actual moments on the moon and other highlights *Apollo 11: The History and Legacy of the First Moon Landing (The History and Legacy of America's Most Famous Space Missions)* Robert Dawson, 101-01-01 The apollo space program is the most famous and celebrated in american history but the first successful landing of men on the moon during apollo 11 had complicated roots dating back over a decade and it also involved one of nasa s most infamous tragedies Landing on the moon presented an ideal goal all on its own but the government s urgency in designing the apollo program was actually brought about by the soviet union which spent much of the 1950s leaving the united states in its dust and rocket fuel In 1957 at a time when people were concerned about communism and nuclear war many americans were dismayed by news that the soviet union was successfully launching satellites into orbit Apollo 11 as well as some predecessor missions as only faked Overview of the first steps of spaceflight and the preparatory missions for apollo already here he discovers more pretense than reality Detailed description of the apollo 11 mission on the basis of the nasa documentation including the evidence that shows the staging of this mission Overview of crewed space flight after apollo 11 Prepare to be captivated as you explore the rabbit hole of technology that propelled humanity into space and the conspiracies questioning its validity Was the lunar module a technological triumph or is there truth to it being a stage prop fabrication This book scrutinizes some of the more serious anomalies out there from the perplexing inconsistencies in lunar photography to the enigmatic survival of astronauts through the van allen radiation belts *Apollo 11: the History and Legacy of the First Moon Landing* Charles River Charles River Editors, 2013-08-26 Includes pictures of important people places and events Comprehensively describes the history of the Apollo program including explaining the design and planning that went into it Includes quotes from the astronauts about the mission Includes footnotes 10 9 ignition sequence start 6 5 4 3 2 1 zero All engines running Liftoff We have a liftoff Thirty two minutes past the hour Liftoff on Apollo 11 Jack King NASA Chief of Public Information At 9 32 a m on July 16 1969 time stood still throughout the world as thousands converged on the Kennedy Space Center and millions tuned in on live television

know the rest of this true American hero's story In *Magnificent Desolation* Aldrin not only gives us a harrowing first person account of the lunar landing that came within seconds of failure and the ultimate insider's view of life as one of the superstars of America's space program he also opens up with remarkable candor about his more personal trials and eventual triumphs back on Earth From the glory of being part of the mission that fulfilled President Kennedy's challenge to reach the moon before the decade was out Aldrin returned home to an Air Force career stripped of purpose or direction other than as a public relations tool that NASA put to relentless use in a seemingly nonstop world tour The twin demons of depression and alcoholism emerged the first of which Aldrin confronted early and publicly and the second of which he met with denial until it nearly killed him He burned through two marriages his Air Force career came to an inglorious end and he found himself selling cars for a living when he wasn't drunkenly wrecking them Redemption came when he finally embraced sobriety gained the love of a woman Lois who would become the great joy of his life and dedicated himself to being a tireless advocate for the future of space exploration not only as a scientific endeavor but also as a thriving commercial enterprise These days Buzz Aldrin is enjoying life with an enthusiasm that reminds us how far it is possible for a person to travel literally and figuratively As an adventure story a searing memoir of self destruction and self renewal and as a visionary rallying cry to once again set our course for Mars and beyond *Magnificent Desolation* is the thoroughly human story of a genuine hero
