and describe their spatial and temporal context The research is based on the collection of a new corpus of Hellenistic book and inscribed dedicatory epigrams which were compared to pre Hellenistic dedicatory epigrams in order to highlight the crucial changes that characterise the development of the epigrammatic genre in the Hellenistic era By demonstrating that the evolution of the epigrammatic genre moved on the same track for book and stone epigrams this work offers an important contribution to the ongoing debate on the history of the epigrammatic genre and aims to stimulate further reflection on a poetic genre which since its origins in the Greek world has been successful both in ancient and modern literary traditions
