Performing the Body/Performing the Text Amelia Jones,Andrew Stephenson Nfa,Andrew Stephenson,2005-08-12 This book explores the new performativity in art theory and practice examining ways of rethinking interpretive processes in visual culture Since the 1960s visual art practices from body art to minimalism have taken contemporary art outside the museum and gallery by embracing theatricality and performance and exploding the boundaries set by traditional art criticism The contributors argue that interpretation needs to be recognised as much more dynamic and contingent Offering its own performance script and embracing both canonical fine artists such as Manet De Kooning and Jasper Johns and performance artists such as Vito Acconci and Gunter Brus this book offers radical re readings of art works and points confidently towards new models for understanding art

Chaos and Cosmos Karen Lang,2018-08-06 Writing in 1940 the prominent German art historian Erwin Panofsky asked How then is it possible to build up art history as a respectable scholarly discipline if its objects come into being by an irrational and subjective process In *Chaos and Cosmos* Karen Lang addresses the power of art to resist the pressures of the transcendental vantage point history Uncovering the intellectual and cultural richness of the early years of academic art history in Germany the period from the 1880s to 1940 she explores various attempts within art history to transform aesthetic phenomena chaos into the cosmos of a systematic unified field of inquiry Lang starts by examining Panofsky s approach to aesthetic phenomena in his early theoretical essays alongside Ernst Cassirer s contemporaneous publications on the substance and function of scientific concepts and on Einstein s theory of relativity She then turns to the subject of aesthetic judgment through a rereading of Kantian subjectivity and Kant s uneasy legacy in art history From here Lang considers the different organizing theories of symbolic form proposed by Aby Warburg and Cassirer as well as Goethe s inspiration for both Alois Riegl s notion of age value and Walter Benjamin s conceptions of the aura concluding with an extended examination of objectivity and the figure of the art connoisseur Extensively illustrated with works of art from the Enlightenment to the present day this venturesome book illuminates an intellectual legacy that has profoundly shaped the study of the history of art in ways that have until now been largely unacknowledged Addressing the interplay of chaos and cosmos in terms of history art history philosophy and epistemology Lang traces shifts in point of view in art history and the way these shifts change aesthetic objects into historical objects and even objects of knowledge

Visual Analogy Barbara Maria Stafford,2001-08-24 A groundbreaking book exploring the discovery of sameness in otherness Recuperating a topic once central to philosophy theology rhetoric and aesthetics this groundbreaking book explores the discovery of sameness in otherness Analogy poses an intriguingly ancient and modern conundrum How in the face of cultural diversity can a unique someone or something be perceived as like what it is not This book is for anyone puzzled by why today as Barbara Maria Stafford claims we possess no language for talking about resemblance only an exaggerated awareness of difference Well designed images Stafford argues reveal the mind s intuitive leaps to connect known with unknown experience The first of four wide ranging chapters paints a challenging overview of several pressing contemporary issues Cloning legal controversies about social inequity identity politics electronic copying and the mimicry of virtual reality expose the need for a nuanced theory of similitude The second examines the historical tug of war between analogy and allegory or disanalogy Stafford provocatively suggests that since the Romantic Era we have been living in polarizingly allegorical times The third roots this divisiveness within the momentous shift from a magical universe modeled on sexual bonds to an engineered world built of discrete automated units Finally recent developments in computational brain research notwithstanding major phenomenological questions about memory emotion intelligence and awareness beckon In the fourth chapter Stafford intervenes in the consciousness debates to propose a humanistic cognitive science with bridging analogy at its artful core
