Big Structures Large Processes Huge Comparisons:

Big Structures, Large Processes, Huge Comparisons Charles Tilly, 1984-12-01 This bold and lively essay is one of those rarest of intellectual achievements a big small book In its short length are condensed enormous erudition and impressive analytical scope With verve and self assurance it addresses a broad central question How can we improve our understanding of the large scale processes and structures that transformed the world of the nineteenth century and are transforming our world today Tilly contends that twentieth century social theories have been encumbered by a nineteenth century heritage of pernicious postulates He subjects each misleading belief to rigorous criticism challenging many standard social science paradigms and methodologies As an alternative to those timeless placeless models of social change and organization Tilly argues convincingly for a program of concrete historically grounded analysis and systematic comparison To illustrate the strategies available for such research Tilly assesses the works of several major practitioners of comparative historical analysis making skillful use of this selective review to offer his own speculative often unconventional accounts of our recent past Historically oriented social scientists will welcome this provocative essay and its wide ranging agenda for comparative historical research Other social scientists their graduate and undergraduate students and even the interested general reader will find this new work by a major scholar stimulating and eminently readable This is the second of five volumes commissioned by the Russell Sage Foundation to mark its seventy fifth anniversary In this short brilliant book Tilly suggests a way to think about theories of historical social change This book should find attentive readers both in undergraduate courses and in graduate seminars It should also find appreciative readers for Tilly is a writer as well as a scholar Choice

The World System Barry Gills, Andre Gunder Frank, 2014-04-04 The historic long term economic interconnections of the world are now universally accepted The idea of the economic world system advanced by Immanuel Wallerstein has set the period of linkage in the early modern period but Andre Gunder Frank and Barry K Gills think that this date is much too late They argue an interconnection going back as much as 5000 years In *The World System* leading academics examine this issue in a debate contributed to by William H McNeill and Immanuel Wallerstein among others *Religion, Humility, and Democracy in a Divided America* Ruth Braunstein, 2019-08-05 Strong religious convictions motivate citizens to engage in American public life and are viewed as a source of closed mindedness and a driver of political polarization This book combines theoretical reflections on this tension empirical studies examine how a range of religious actors balance conviction with humility in their political work *Memory Laws, Memory Wars* Nikolay Koposov, 2018 A major contribution to our understanding of present day historical consciousness through a study of memory laws across Europe [Writing the History of Slavery](#) David Stefan Doddington, Enrico Dal Lago, 2022-01-13 Exploring the major historiographical theoretical and methodological approaches that have shaped studies on slavery this addition to the Writing History series highlights the varied ways that historians have approached the fluid and complex systems of human bondage domination and exploitation

that have developed in societies across the world The first part examines more recent attempts to place slavery in a global context touching on contexts such as religion empire and capitalism In its second part the book looks closely at the key themes and methods that emerge as historians reckon with the dynamics of historical slavery These range from politics economics and quantitative analyses to race and gender to psychohistory history from below and many more Throughout examples of slavery and its impact are considered across time and place in Ancient Greece and Rome Medieval Europe colonial Asia Africa and the Americas and trades throughout the Atlantic and Indian Oceans Also taken into account are thinkers from Antiquity to the 20th century and the impact their ideas have had on the subject and the debates that follow This book is essential reading for students and scholars at all levels who are interested in not only the history of slavery but in how that history has come to be written and how its debates have been framed across civilizations

Figured Tapestry Philip Scranton, 2002-08-22 Figured Tapestry is a study of industrial maturity and decline focused on the Philadelphia textile trades from the era of the Knights of Labor through World War II Unlike the bulk fabric enterprises of New England and the South Quaker City textile firms were flexible specialists combining skilled labor versatile technologies and quick responsiveness to demand shifts to create a vast array of seasonal goods Scranton assesses the significance and limits of industrial versatility owner operated businesses craft labor and its organizations and the agglomeration of specialist mills in urban districts An interdisciplinary blend of business labor urban and economic history industrial geography and the history of technology Figured Tapestry illuminates the hidden world of batch production the other side of American industrialization and highlights both the benefits and the hazards of flexibility a matter of moment to those who seek to reorient current manufacturing away from the rigidities of mass production

Arresting Development Craig Johnson, 2008-11-28 Scholars have become increasingly concerned about the impact of neo liberalism on the field of development Governments around the world have for some time been exposed to the forces of globalization and macro economic reform reflecting the power and influence of the world's principal international economic institutions and a broader commitment to the principles of neo classical economics and free trade Concerns have also been raised that neo classical theory now dominates the ways in which scholars frame and ask their questions in the field of development This book is about the ways in which ideologies shape the construction of knowledge for development A central theme concerns the impact of neo liberalism on contemporary development theory and research The book's main objectives are twofold One is to understand the ways in which neo liberalism has framed and defined the meta theoretical aims and assumptions of what is deemed relevant important and appropriate to the study of development A second is to explore the theoretical and ideological terms on which an alternative to neo classical theory may be theorized idealized and pursued By tracing the impact of Marxism postmodernism and liberalism on the study of development Arresting Development contends that development has become increasingly fragmented in terms of the theories and methodologies it uses to understand and explain complex and contextually specific

processes of economic development and social change Outside of neo classical economics and related fields of rational choice the notion that social science can or should aim to develop general and predictive theories about development has become mired in a philosophical and political orientation that questions the ability of scholars to make universal or comparative statements about the nature of history cultural diversity and progress To advance the debate a case is made that development needs to re capture what the American sociologist Peter Evans once called the comparative institutional method At the heart of this approach is an inductive methodology that searches for commonalities and connections to broader historical trends and problems while at the same time incorporating divergent and potentially competing views about the nature of history culture and development This book will be of interest to scholars and students of Development Social and Political Studies and it will also be beneficial to professionals interested in the challenge of constructing knowledge for development

Politics, Violence, Memory Jeffrey S. Kopstein, Jelena Subotić, Susan Welch, 2023-01-15 Politics Violence Memory highlights important new social scientific research on the Holocaust and initiates the integration of the Holocaust into mainstream social scientific research in a way that will be useful both for social scientists and historians Until recently social scientists largely ignored the Holocaust despite the centrality of these tragic events to many of their own concepts and theories In Politics Violence Memory the editors bring together contributions to understanding the Holocaust from a variety of disciplines including political science sociology demography and public health The chapters examine the sources and measurement of antisemitism explanations for collaboration rescue and survival competing accounts of neighbor on neighbor violence and the legacies of the Holocaust in contemporary Europe Politics Violence Memory brings new data to bear on these important concerns and shows how older data can be deployed in new ways to understand the index case of violence in the modern world

Ulysses Quotidianus Jibu George, 2016-05-11 This book presents a multi pronged inverse historical analysis of Joyce s high modernist magnum opus Ulysses foregrounding the historicity of its unapologetic subject matter the quotidian It argues that the everyday life depicted in Ulysses espouses alternative historical trajectories neglected by traditional historiographic paradigms which largely deal with great personages and momentous events The sphere of ordinary life is also where lasting changes must be accomplished if transformations are to happen at all in what gets written or accepted as a posteriori history Across eight elaborate chapters the book reconstructs quotidian micro histories surrounding work and

income material objects and practices everyday relationships body and health ideologies and power socio psychological resources and in one of the many internal heterogenizations of the everyday gender issues
