Arms And Artificial Intelligence Weapon And Arms Control Applications Of Advanced Computing:

Arms and Artificial Intelligence Stockholm International Peace Research Institute, 1987 The impact of information technology in the field of military decision making is superficially less visible than that of a number of other weapon developments though its importance has grown steadily since the beginning of the 1980s Owing to its potential role in modern weapon systems and the prospect of its inclusion as an essential ingredient in many military projects such as the Strategic Defence Initiative it has become the focus of special interest and efforts This book is the first attempt to present a broad overview of the prospects for information technology in general and machine intelligence in particular in the context of international security The dangers and promises of weapon and arms control applications of computers and artificial intelligence to decision making processes are analysed in a technical strategic and political perspective by experts from six different countries In an introductory chapter Allan Din presents a generic overview of artificial intelligence and its prospects Thirteen contributors then discuss the conceptual and technical framework of artificial intelligence analyse implications for weapon systems and strategy and discuss possible applications to arms control verification and modelling *Bases Abroad* Robert E. Harkavy, 1989 Analyzing the modern status of military bases and the diplomacy that defines their location and access this book explores the global basing networks of the world s major military powers their type location and the politics and economics of their acquisition It provides data on armaments intelligence communications research and space facilities tables and maps that display U S and Soviet global networks and the various military roles and nuclear deterrence capabilities for global power projection and support of client states in the Third World Harkavy also discusses emerging political and technological developments that could alter basing diplomacy *Special Bibliography Series* United States Air Force Academy. Library, 1990 **Special Bibliography Series**, 1957 **Postmodern War** Chris Hables Gray, 2013-11-12 Postmodern War poses an urgent challenge to the ways we conceptualize and actually wage war in our high technology age Computerization and artificial intelligence have brought about a revolution in warfare spawning both increasingly powerful weapons and a rhetoric which disguises their apocalyptic potential in catch phrases like smart weapons and bloodless combat Postmodern War examines contemporary practices of war defining and critiquing trendy military doctrines hidden behind phrases like Infowar and Cyberwar the roles of those who manipulate high technology those who are manipulated by it and those who are increasingly merging with it the role of peace activists and socially responsible scientists in countering dangerous assumptions made by a postmodern military Far from opposing technological change however Gray finds new hopes for peace in the twenty first century Provocative and far reaching in its scope the book argues that postmodern war has left us poised between the most dreadful and most utopian of alternatives we may eradicate either the human race or war itself [The Political Economy of Robots](#) Ryan David Kiggins, 2025-08-31 This collection examines implications of technological automation to global prosperity and peace Focusing on robots information communication technologies and

other automation technologies it offers brief interventions that assess how automation may alter extant political social and economic institutions norms and practices that comprise the global political economy In doing so this collection deals directly with such issues as automated production trade war state sanctioned robot violence financial speculation transnational crime and policy decision making This interdisciplinary volume will appeal to students scholars and practitioners grappling with political economic and social problems that arise from rapid technological change that automates the prospects for human prosperity and peace

Rethinking National Security Frances Scott,1990 [Feminism and International Relations](#) J. Ann Tickner,Laura Sjoberg,2013-07-03 Feminist International Relations scholarship in the United States recently celebrated its 20th anniversary Over those years feminist researchers have made substantial progress concerning the question of how gender matters in global politics global economics and global culture The progress has been noted both in the academic field of international relations and increasingly in the policy world Celebrating these achievements this book constructs conversations about the history present state of and future of feminist International Relations as a field across subfields of IR continents and generations of scholars Providing an overview and assessment of what it means to gender IR in the 21st century the volume has a unique format it features a series of intellectual conversations presenting cutting edge research in the field with provocative comments from senior scholars It examines issues including global governance the United Nations war peace security science beauty and human rights and addresses key questions including What does viewing the diverse problems of global politics through gendered lenses look like in the 21st Century How do feminisms accommodate differences in culture race and religion How do feminist theoretical and policy analyses fit together These conversations about feminist IR are accessible to non specialist audiences and will be of interest to students and scholars of Gender Studies Feminist Politics and International Relations
