Arbitration - Second Edition Tobias Zuberbühler, Christoph Müller, Philipp Habegger, 2013-08-01. NO SALES RIGHTS IN SWITZERLAND. This second edition of the first comprehensive commentary on the Swiss Rules of International Arbitration covers the new version of these rules which entered into force on 1 June 2012. It is a practical guide for arbitrators, counsel, state courts and persons involved in the conduct and administration of arbitral proceedings under the Swiss Rules. This commentary presents the new version of the Swiss Rules from a double perspective. On the one hand, it emphasizes the relationship between these Rules and the Swiss legal regime governing international arbitration, namely the provisions of chapter 12 of the Swiss Private International Law Statute. On the other hand, it puts these Rules in an international perspective by comparing them with the corresponding provisions of the other major institutional rules: ICC, LCIA, SCC, DIS, VIAC, SIAC, HKIAC, CIETAC, AAA, ICDR, WIPO and ICSID, and with the provisions of the former edition of the rules. Finally, it highlights the main differences between the Swiss Rules and the UNCITRAL Arbitration Rules, which were revised in 2010. This book is written by arbitration practitioners based in Switzerland who work with established law firms widely experienced in international commercial arbitration. It is the work of a refreshing new generation of Swiss arbitration specialists. Two of the editors were members of the working group for the revision of the Swiss Rules and thus bring special insight into the book about the revision process. International Environmental Law Ulrich Beyerlin, Thilo

Marauhn, 2011-08-11. *International Environmental Law* is a new textbook written for students, practitioners and anyone interested in the subject. The overall aim of the book is to provide a fresh understanding of international environmental law as a whole, seen in the light of climate change, biodiversity loss and the other serious environmental challenges facing the world. The book has also been kept deliberately manageable in size by careful selection of topics and by adopting a cross-cutting synthesis of regulatory interaction in the field. This enables the reader to place international environmental law in the broader context of public international law in general, revealing at the same time that international environmental law is experimental ground for developing new legal approaches towards global governance. To this end, the authors have combined

theory and practice Apart from discussing concepts rule making and compliance the book looks at options for improved coordination harmonisation and even integration of existing multilateral environmental agreements analysing how conflicts between various environmental regimes can be avoided or at least adequately managed The authors argue that an appropriate management of international environmental relations must address the North South divide which continues to be a major obstacle to global environmental cooperation Furthermore the authors emphasise the growing human rights dimension of international environmental law This book is an ideal door opener for the further study of international environmental law Focusing on international environmental governance in a comprehensive way it serves to explain that each institution each actor and each instrument is part of a multi dimensional process in international environmental law and relations

Daniel Kraus,Thierry Obrist,Olivier Hari,2019 The growth of Blockchain technology presents a number of legal questions for lawyers regulators and industry participants alike Primarily regulators must allow Blockchain technology to develop whilst also ensuring it is not being abused This book addresses the challenges posed by various applications of Blockchain technology such as cryptocurrencies smart contracts and initial coin offerings across different fields of law Contributors explore whether the problems posed by Blockchain and its applications can be addressed within the present legal system or whether significant rethinking is required International Law for Common Goods Federico Lenzerini,Ana Filipa

Vrdoljak,2014-12-01 International law has long been dominated by the State But it has become apparent that this bias is unrealistic and untenable in the contemporary world as the rise of the notion of common goods challenges this dominance These common goods typically values like human rights rule of law etc or common domains the environment cultural heritage space etc speak to an emergent international community beyond the society of States and the attendant rights and obligations of non State actors This book details how three key areas of international law human rights culture and the environment are pushing the boundaries in this field Each category is of current and ongoing significance in legal and public discourse as illustrated by the Syrian conflict human rights and international humanitarian law the destruction of mausoleums and manuscripts in Mali cultural heritage and the Deepwater Horizon oil spill the environment Each exemplifies the need to move beyond a State focused idea of international law This timely volume explores how the idea of common goods in which rights and obligations extend to individuals groups and the international community offers one such avenue and reflects on its transformative impact on international law Aldo Iacobelli Aldo Iacobelli,John Neylon,2006 This book provides an overview of Iacobelli s work from around 1984 to 2006 It includes his monumental drawings of the 80s Side One
