Arms Race Theory Strategy And Structure Of Behavior:

Arms Race Theory Craig Etcheson, 1989-07-12 For most of the twentieth century social scientists have attempted to understand the causes of military competition. From this struggle has evolved the Richardson Tradition of Arms Race Analysis, a distinct body of scientific literature that uses a variety of mathematical techniques and theoretical ideas to solve the puzzle of what drives military interaction among nations. Etcheson explores this intellectual journey and projects the paths along which the Richardson Tradition must go if it is to obtain its objective understanding and control of potentially unnecessary organized social violence. Arms Race Theory examines thoroughly the literature of the Richardson Tradition from the writings of Lewis Fry Richardson through the most recent attempts of his students to resolve the fundamental questions about interaction in arms races. Etcheson documents the application of the procedures of positive physical science to social problems and identifies the reasons why Richardson and his students have been frustrated in their efforts. According to the author, students of the Richardson Tradition adhere to an atomistic and reductionist perspective that denies the relevance of human values and intentions. He focuses on the idea of strategy as a gateway to an understanding of the social causes of arms accumulation. Etcheson prepares the way for a new phase in the Richardson Tradition by identifying new theoretical foci and methodological techniques. His analysis, coupled with the most comprehensive bibliography of the literature of the Richardson Tradition currently available, is a significant contribution to the growing body of scholarship in peace research and international relations theory.

Thomas Schelling and the Nuclear Age Robert Ayson, 2020-09-23 An illuminating insight into the work of Thomas Schelling, one of the most influential strategic thinkers of the nuclear age. By the time of the Cuban Missile Crisis and the United States' early forays into Vietnam, he had become one of the most distinctive voices in Western strategy. This book shows how Schelling's thinking is much more than a reaction to the tensions of the Cold War. In a demonstration that ideas can be just as significant as superpower politics, Robert Ayson traces the way this Harvard University professor built a unique intellectual framework using a mix of social scientific reasoning from economics to social theory and psychology. As such, this volume offers a rare glimpse into the intellectual history which underpins classical thinking on nuclear strategy and arms control, thinking which still has an enormous influence in the early twenty-first century.

Arming the Two Koreas Taik-Young Hamm, 2012-10-12 North Korea has traditionally been seen as militarily superior to South Korea in the long feud between the two nations. This brilliantly argued book taps into a great deal of news interest in North Korea at the moment in the wake of recent hostility against Japan. Hamm controversially shows that the received idea of Korea's military strength is partly a myth created by South Korea to justify a huge programme of rearmament.

Lessons from World War I for the Rise of Asia Andreas Herberg-Rothe, 2015-06-01 This groundbreaking volume offers a historical comparison between the events leading up to World War I and current global tensions related to the economical and political rise of Asia. What are the risks that the desire of the new super power China and great powers like India to be recognized by

the West could set off a chain of events resulting in the nightmare of a great power war Assessing the similarities as well as differences between the build up of World War I and today it is argued that we need to understand the driving forces behind the scene of global politics The conflict between rising established and disintegrating powers and the desire of recognition on all sides Carefully dissecting the current power dynamics in play the authors hope to contribute to a better understanding of world events in order to ensure that history will not repeat itself **Constructing Regional Security** W. Durch,2016-04-30

In this book William Durch examines conventional weapons proliferation since World War II the role of arms transfers in fueling regional conflict and prospects for curbing the global arms trade Noting that supply side arms control efforts which seek to constrain the companies and countries that produce and distribute major conventional weapons have a poor international track record Durch argues for a broader approach that tries to get at the demand side of the equation Addressing the political and regional dynamics that impel arms acquisitions he looks at how arms control might be combined with confidence and security building measures to contain demand and how value based arms trade control measures like codes of conduct could be implemented in stepwise fashion consistent with US national interests in regional stability The
