Art And Social Life:

Modern Chinese Literary Thought Kirk A. Denton, 1996 This volume presents a broad range of writings on modern Chinese literature Of the fifty five essays included forty seven are translated here for the first time including two essays by Lu Xun In addition the editor has provided an extensive general introduction and shorter introductions to the five parts of the book historical background a synthesis of current scholarship on modern views of Chinese literature and an original thesis on the complex formation of Chinese literary modernity The collection reflects both the mainstream Marxist interpretation of the literary values of modern China and the marginalized views proscribed at one time or another by the leftist canon It offers a full spectrum of modern Chinese perceptions of fundamental literary issues Art and Social Life Georgii Valentinovich Plekhanov, 1978 **Art and Social Life** Georgii Valentinovich Plekhanov, 2003-01-01 **Marxism and Art** Maynard Solomon, 1979 Marxism and Art is a book of basic readings in Marxist criticism and aesthetics Maynard Solomon through his selections and critical introductions shows connections between the arts and society between imagination and history and between art and revolution He selects from thirty six authors to reveal the range of opinion from dogma to heresy beginning with excerpts from the works of Marx and Engels that are pertinent to an understanding of Marxist philosophy The book traverses a wide range of subjects from the origins of art to the nature of creativity the aesthetic experience the dialectics of consciousness the psychology of art and the evolution of art forms The sources of art in ritual in the labor process in the play drive and in social conflict are explored **Information and Creation** German Golitsyn, Vladimir Petrov, 2012-12-06 This book is devoted to one of the central problems of contemporary thinking for which C P Snow in 1959 coined the phrase of the Two Cultures In this concept human endeavour is directed on one side to the forward looking sciences mathematics physics chemistry biology etc and on the other side to the backward looking humanities including psychology linguistics sociology etc In this dichotomy Snow saw no possibility of unification On the other hand the urge towards self consistency and harmony in the mental and spiritual lives of both man and society as a whole is clearly one of the major forces of creativity both scientific and artistic This force aims at the unification of the Two Cultures in order to build an integrated self consistent system for our intellectual life Some attempts in this direction have been made before and will be described in this book It is our aim to contribute to the achievement of an integrated mental life on the basis of information theory In order to construct our model we examine the laws of information theory leading us to the deduction of the main laws inherent in both cultures Thus we consider the evolution of both non living and living matter human behaviour the phenomenon of language the sphere of aesthetics etc We hope that our work will be useful both for researchers who are trying to derive different integral theories and for various other consumers of scientific knowledge meaning broad circles of intellectuals **Man's Work and Leisure** N.
