Diplomacy: A Very Short Introduction Joseph M. Siracusa, 2010-08-26 Like making war diplomacy has been around a very long time at least since the Bronze Age It was primitive by today's standards there were few rules but it was a recognizable form of diplomacy Since then diplomacy has evolved greatly coming to mean different things to different persons at different times ranging from the elegant to the inelegant Whatever one's definition few could doubt that the course and consequences of the major events of modern international diplomacy have shaped and changed the global world in which we live Joseph M Siracusa introduces the subject of diplomacy from a historical perspective providing examples from significant historical phases and episodes to illustrate the art of diplomacy in action

ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Diplomatic History Joseph M. Siracusa, 2021 Diplomatic history is the critical study of the management of relations between nation states Based on significant historical case studies the American Revolution the origins of the Great War and its aftermath Versailles the Iraq War and diplomacy in the age of globalization this book locates

the universal role of diplomatic negotiation The Origins of World War I Richard F. Hamilton, Holger H. Herwig, 2003-02-24 This work poses a straightforward yet at the same time perplexing question about World War I Why did it happen Several of the oft cited causes are reviewed and discussed The argument of the alliance systems is inadequate lacking relevance or compelling force The arguments of mass demands those focusing on nationalism militarism and social Darwinism it is argued are insufficient lacking indications of frequency intensity and process how they influenced the various decisions The work focuses on decision making on the choices made by small coterie in Austria Hungary Germany Russia France Britain and elsewhere The decisions made later by leaders in Japan the Ottoman Empire Italy the Balkans and the United States are also explored The final chapters review the basic causes once again An alternative position is advanced one focused on elites and coterie their backgrounds and training and on their unique agendas **The Marne, 1914** Holger H. Herwig, 2011-02-08 For the first time in a generation here is a bold new account of the Battle of the Marne a cataclysmic encounter that prevented a quick German victory in World War I and changed the course of two wars and the world With exclusive information based on newly unearthed documents Holger H Herwig re creates the dramatic battle and reinterprets Germany's aggressive Schlieffen Plan as a carefully crafted design to avoid a protracted war against superior coalitions He paints a fresh portrait of the run up to the Marne and puts in dazzling relief the Battle of the Marne itself the French resolve to win and the crucial lack of coordination between Germany's First and Second Armies Herwig also provides stunning cameos of all the important players from Germany's Chief of General Staff Helmuth von Moltke to his rival France's Joseph Joffre Revelatory and riveting this is the source on this seminal event *Imperialism* Bonnie G. Smith, 2000 Presents documents that provide many accounts from around the globe of imperialism *The Making of a Terrorist* Jeff Horn, 2021 This is the story of how an educated young man decided that the French Revolution was worth the use of state sponsored violence chose to become a terrorist to protect the republic and spent the next five decades defending his actions *The Fog of Peace and War Planning* Talbot C. Imlay, Monica Duffy Toft, 2007-01-24 How do we plan under conditions of uncertainty The perspective of military planners is a key organizing framework do they see themselves as preparing to administer a peace or preparing to fight a future war Most interwar volumes examine only the 1920s and the 1930s This new volume goes back and forward in time to draw on a greater expanse of history in order to tease out lessons for contemporary planners These chapters are grouped into four periods 1815 1856 1871 1914 1918 1938 and post Second World War They progress from low tech to high tech concerns for example the first period examines armies while the second period examines navies the third assesses navies combined with air forces and finally for the Kaiser chapter explores nuclear issues and decision making **China Goes to Sea** Andrew S. Erickson, Lyle J Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks But China's turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets its vast and expanding

merchant marine the wide offshore reach of its energy and minerals exploration companies its growing fishing fleet and indeed its increasingly modern navy Yet for all these achievements there is still profound skepticism regarding China's potential as a genuine maritime power Beijing must still import the most vital subcomponents for its shipyards maritime governance remains severely bureaucratically challenged and the navy evinces at least as of yet little enthusiasm for significant blue water power projection capabilities This volume provides a truly comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context China is hardly the only land power in history to attempt transformation by fostering sea power Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure Too many works on China view the nation in isolation Of course China's history and culture are to some extent exceptional but building intellectual fences actually hinders the effort to understand China's current development trajectory Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders this comparative study provides reason to believe that China has turned the corner on a genuine maritime transformation If that proves indeed to be the case it would be a remarkable if not singular event in the history of the last two millennia
