## Artful Creation:

**The Sacramentality of Music** Christina Labriola, 2024-08-19 Steeped in the Catholic spiritual tradition The Sacramentality of Music argues that musical experience in its appeal to the entirety of the human person can serve as a locus of encounter with the divine and an occasion of God's self-revelation in love with spiritually nurturing ultimately transformative ends Christina Labriola contends that this dynamic might most aptly be understood as sacramental an all encompassing perspective of the cosmos permeated by the divine creative salvific sustaining presence Through its participation in the mysteries of beauty and creativity its bodily and affective engagement and impact on the inner life music operates sacramentally manifesting divine realities through the tangible stuff of human experience In a thematic theological exploration that interweaves pastoral theology theological aesthetics and mysticism the reader is invited to contemplate music's sacramental potentiality and to engage the sacramentally charged music of Beethoven Bartok MacMillan Messiaen Mozart Envalds Bach Pärt and Hildegard In attending to musical ways of relating to God this book invites readers into a deepening awareness of the sacramental nature of reality itself as that in which the spiritual resonance of music is grounded and reveals afresh taking musical beauty seriously in the spiritual order with repercussions for Christian living *Creation's Beauty as Revelation* L. Clifton Edwards, 2014-03-05 With an interdisciplinary approach Edwards utilizes literature aesthetics world religions and continental philosophy as avenues into the theology of natural beauty This is an epistemological look at our aesthetically charged knowing of God through nature Emphasizing our embodied experience of the world Edwards examines the phenomenon of perceptual beauty while questioning traditional notions of God's metaphysical beauty Drawing upon Michael Polanyi's philosophy of science Edwards explores the human aesthetic and religious interface with the natural world This philosophical approach is then linked to the poetic Polanyi's tacit knowledge and Jean Luc Marion's saturated phenomena give support to Wordsworth's pregnant vision of the natural world This approach culminates in a re-envisioning of John Ruskin's typology of natural beauty Ruskin's vision of the world can be adapted toward an understanding of natural revelation Edwards brings this Romantic theology back across the Atlantic in dialogue with American nature writers and the uniquely American experience of wilderness and frontier

**The Value of Arts for Business** Giovanni Schiuma, 2011-05-19 The traditional view of the relationship between business and the arts is very much a one-way affair organisations may endorse fund or publicise the arts but the arts have nothing to offer from a business perspective The Value of Arts for Business challenges this view by showing how the arts in the form of Arts based Initiatives ABIs can be used to enhance value creation capacity and boost business performance The book introduces and explains three models that show how organisations can successfully implement and manage ABIs Firstly the Arts Value Matrix enables managers to see how organisational value drivers are affected by ABIs Secondly the Arts Benefits Constellation shows how to assess the benefits of using ABIs Finally the Arts Value Map shows how ABIs can be integrated and aligned with organisational strategy and

operations These models lay the foundations for a new research area exploring the links between arts and business

**Co-Creation in Higher Education** Tatiana Chemi, Lone Krogh, 2017-09-12 The main purpose of this book is to disseminate new research on co creative approaches to teaching and learning in Higher Education HE The cases presented draw from a Danish cultural and educational context and have a special focus on collaborative co creative and distributed perspectives With this collected volume we wish to show the diversity of approaches to the concept of co creation on the one hand and on the other we intend to give a specific direction to these studies which is humanistic sociological creative and pedagogical The contexts we look at are problem based and student led learning arts based approaches to higher educational research and teaching collaborative practices We believe that these perspectives are still in need of further investigation through theories and practices We understand co creation as the process of creative original and valuable generation of shared meaning and development This collected volume offers novel empirical documentation and original theoretical reflections on the application of co creative processes in higher education This can be directly relevant for educators and the ways in which they design education but also for students and the ways in which they cope with and manage an ever changing academic labour market
