

The background of the cover is an abstract, painterly composition. It features a blend of warm colors (yellow, orange, red) on the left and cooler colors (blue, white, pink) on the right. A faint, dark silhouette of a human face is visible, particularly on the right side, with the eye area appearing as a dark void. The overall texture is soft and blended, suggesting a creative or artistic theme.

Art Practice As Research:

Art Practice as Research Graeme Sullivan, 2010 Art Practice as Research Second Edition continues to present a compelling argument that the creative and cultural inquiry undertaken by artists is a form of research. The text explores themes, practices, and contexts of artistic inquiry and positions them within the discourse of research. Sullivan argues that legitimate research goals can be achieved by choosing different methods than those offered by the social sciences. The common denominator in both approaches is the attention given to rigor and systematic inquiry. Artists emphasize the role of the imaginative intellect in creating, criticizing, and constructing knowledge that is not only new but also has the capacity to transform human understanding.

Art Practice as Research Graeme Sullivan, 2005 This book will publish in a new edition on December 1, 2009. We are no longer supplying instructors with complimentary review copies of this edition. If you need an urgent desk copy of the existing edition for a class this semester, please call 1 800 818 7243 and we will be pleased to process your request. In this rich and layered reflection on visual arts practice as research, Graeme Sullivan launches a passionate and convincing case that rewrites the definitions of art and research as it unapologetically claims for the visual arts the respect and admiration of the academy.

Jessica Hoffman Davis, Harvard University Art Practice as Research Inquiry in the Visual Arts presents a compelling argument that the creative and cultural inquiry undertaken by artists is a form of research. The text explores themes, practices, and contexts of artistic inquiry and positions them within the discourse of research. Author Graeme Sullivan argues that legitimate research goals can be achieved by choosing different methods than those offered by the social sciences. The common denominator in both approaches is the attention given to rigor and systematic inquiry. Artists emphasize the role of the imaginative intellect in creating, criticizing, and constructing knowledge that is not only new but also has the capacity to transform human understanding. The book is divided into three content areas that provide a unique framework for carrying out inquiry in the visual arts.

Contexts for Visual Arts Research is a historical review that positions the visual arts as a culturally grounded and institutionally bound area of artistic and educational inquiry. Theorizing Visual Arts Practice presents the thesis that visual arts practice is a theoretically robust area of inquiry and a transformative approach to creating and critiquing knowledge. Visual Arts Research Practices describes a range of strategies and approaches to planning and carrying out visual arts research.

Visual Arts Research is a historical review that positions the visual arts as a culturally grounded and institutionally bound area of artistic and educational inquiry. Art Practice as Research is perfectly suited as a text for courses in art education, the visual arts, as well as general research methods courses in education and the humanities. This will also be an invaluable reference for anyone with an interest in interdisciplinary research in the social sciences and the role of imaginative inquiry in human understanding.

A blog by Graeme Sullivan welcoming contributors interested in discussing ideas and sharing information about art as a form of research. Praise for this text: Sullivan challenges our assumptions about what constitutes research practices and in doing so presents a ground-breaking analysis for visual arts practice as research.
