Statistics Byron W. Brown, Byron Wm. Brown, Jr., Myles Hollander, 1977-10-04 Elementary rules of probability Populations samples and the distribution of the sample mean Analysis of matched pairs using sample means Analysis of the two sample location problem using sample means Surveys and experiments in medical research Statistical inference for dichotomous variables Comparing two success probabilities Chi squared tests Analysis of k sample problems Linear regression and correlation Analysis of matched pairs using ranks Analysis of the two sample location problem using ranks Methods for censored data *Simulation and the Monte Carlo Method* Reuven Y. Rubinstein, 2009-09-25 This book provides the first simultaneous coverage of the statistical aspects of simulation and Monte Carlo methods their commonalities and their differences for the solution of a wide spectrum of engineering and scientific problems It contains standard material usually considered in Monte Carlo simulation as well as new material such as variance reduction techniques regenerative simulation and Monte Carlo optimization

Parameter Estimation in Engineering and Science James Vere Beck, Kenneth J. Arnold, 1977 Introduction to and survey of parameter estimation Probability Introduction to statistics Parameter estimation methods Introduction to linear estimation Matrix analysis for linear parameter estimation Minimization of sum of squares functions for models nonlinear in parameters Design of optimal experiments **Robust Statistics** Peter J. Huber, 2005-02-04 The first systematic book length treatment of the subject Begins with a general introduction and the formal mathematical background behind qualitative and quantitative robustness Stresses concepts Provides selected numerical algorithms for computing robust estimates as well as convergence proofs Tables contain quantitative robustness information for a variety of estimates

Multiple Time Series Edward James Hannan, 2009-09-25 The Wiley Series in Probability and Statistics is a collection of topics of current research interests in both pure and applied statistics and probability developments in the field and classical methods This series provides essential and invaluable reading for all statisticians whether in academia industry government or research *Sensitivity Analysis in Linear Regression* Samprit Chatterjee, Ali S. Hadi, 2009-09-25 Treats linear regression diagnostics as a tool for application of linear regression models to real life data Presentation makes extensive use of examples to illustrate theory Assesses the effect of measurement errors on the estimated coefficients which is not accounted for in a standard least squares estimate but is important where regression coefficients are used to apportion effects due to different variables Also assesses qualitatively and numerically the robustness of the regression fit

Robust Estimation and Testing Robert G. Staudte, Simon J. Sheather, 2011-09-15 An introduction to the theory and methods of robust statistics providing students with practical methods for carrying out robust procedures in a variety of statistical contexts and explaining the advantages of these procedures In addition the text develops techniques and concepts likely to be useful in the future analysis of new statistical models and procedures Emphasizing the concepts of breakdown point and influence function of an estimator it demonstrates the technique of expressing an estimator as a descriptive measure from which its influence

function can be derived and then used to explore the efficiency and robustness properties of the estimator Mathematical techniques are complemented by computational algorithms and Minitab macros for finding bootstrap and influence function estimates of standard errors of the estimators robust confidence intervals robust regression estimates and their standard errors Includes examples and problems

Survival Models and Data Analysis Regina C. Elandt-Johnson, Norman L. Johnson, 2014-11-05 Survival analysis deals with the distribution of life times essentially the times from an initiating event such as birth or the start of a job to some terminal event such as death or pension This book originally published in 1980 surveys and analyzes methods that use survival measurements and concepts and helps readers apply the appropriate method for a given situation Four broad sections cover introductions to data univariate survival function multiple failure data and advanced topics
