The Trojan Horse in the Tribal Classroom Thomas Alan Tobin, 2022-05-04 The Trojan Horse in the Tribal Classroom

How Culture Wars are Waged and Won on the Front Lines of Education By Thomas Alan Tobin All three hundred thirty million of us are immersed in culture wars at every turn It s one of the great disadvantages of diversity One such warfare has been hidden from all of us despite the fact that we had to face it almost daily in our formative years The battleground for this most common cultural conflict is where we all spent at least 40% of our school years preparing not just for unforeseen pandemics such as we re caught up in now nor also for dealing with the economic ecological and political divisions that currently confront all arenas of American society Surprisingly it s our educational system and especially the classroom where the frontlines of cultural warfare may have kept us constantly struggling for so long Unwittingly and unwillingly drafted into these social and cultural battles we ve been trained to continue this perennial struggle between academic and popular sub cultures in our schools The Trojan Horse in the Tribal Classroom reveals the situational factors and functions that have caused education to become an embattled institution and teaching an embattled profession Most importantly it proposes social and cultural solutions to these problems that promise real institution wide improvement and a completely reconstructed truly academic classroom culture One reading of this book will totally revise one s vision of American education and our memories of thousands of hours of classroom life Dr Regina Peter Executive Director NEWMARK Education

Alignment in Communication Ipke Wachsmuth, Jan de Ruiter, Petra Jaecks, Stefan Kopp, 2013-11-15 Alignment in Communication is a novel direction in communication research which focuses on interactive adaptation processes assumed to be more or less automatic in humans It offers an alternative to established theories of human communication and also has important implications for human machine interaction A collection of articles by international researchers in linguistics psychology artificial intelligence and social robotics this book provides evidence on why such alignment occurs and the role it plays in communication Complemented by a discussion of methodologies and explanatory frameworks from dialogue theory it presents cornerstones of an emerging new theory of communication The ultimate purpose is to extend our knowledge about human communication as well as creating a foundation for natural multimodal dialogue in human machine interaction Its cross disciplinary nature makes the book a useful reference for cognitive scientists linguists psychologists and language philosophers as well as engineers developing conversational agents and social robots
