Mingus, 2017-10-05 Located in the often contentious center of the European continent German territory has regularly served as a primary tool through which to understand and study Germany's economic cultural and political development Many German geographers throughout the nineteenth and early twentieth centuries became deeply invested in geopolitical determinism the idea that a nation's territorial holdings or losses dictate every other aspect of its existence Taking this as his premise Mingus focuses on the use of maps as mediums through which the United States Great Britain and the Soviet Union sought to reshape German national identity after the Second World War As important as maps and the study of geography have been to the field of European history few scholars have looked at the postwar development of occupied Germany through the lens of the map the most effective means to orient German citizens ontologically within a clearly and purposefully delineated spatial framework Mingus traces the institutions and individuals involved in the massive cartographic overhaul of postwar Germany In doing so he explores not only the causes and methods behind the production and reproduction of Germany's mapped space but also the very real consequences of this practice

Jahrhunderts werden in den Literatur und Geisteswissenschaften quantitative Verfahren angewandt um Texte zu beschreiben zu analysieren und zu interpretieren Bis zum Ende des 20.
