44 Year Pursuit Of Color Photography:

Cyril Farny, a 44 Year Pursuit of Color Photography Cyril Farny, 1984 *Craftsman Farms* Heather E. Stivison, 2014-10-13 Craftsman Farms was the country estate of the father of the American Arts and Crafts movement Gustav Stickley Though Stickley is credited with creating hundreds of home designs this property contains the only home he designed and built for his own use His rustic log house was built upon a rolling hillside surrounded by lawns stone walls and working farmland In September 1917 the property was purchased by Sylvia and George Farny who loved it dearly and passed it on to their descendants Portions of the 650 acres were sold but the core remained intact until the 1980s when it was threatened by condominium development Community activists launched a Save the Farms campaign which led to the Township of Parsippany Troy Hills purchasing Craftsman Farms through eminent domain Today it is a busy historic house museum operated by the nonprofit Craftsman Farms Foundation Craftsman Farms showcases the significant design legacy Gustav Stickley created as well as the architectural and landscape history of this New Jersey National Historic Landmark

Princeton Alumni Weekly , 1984 *Face Perception across the Life-Span* Bozana Meinhardt-Injac, Andrea Hildebrandt, 2017-03-17 Face perception is a highly evolved visual skills in humans This complex ability develops across the life span steeply rising in infancy refining across childhood and adolescence reaching highest levels in adulthood and declining in old age As such the development of face perception comprises multiple skills including sensory e g mechanisms of holistic configural and featural perception cognitive e g memory processing speed attentional control and also emotional and social e g reading and interpreting facial expression domains Whereas our understanding of specific functional domains involved in face perception is growing there is further pressing demand for a multidisciplinary approach toward a more integrated view describing how face perception ability relates to and develops with other domains of sensory and cognitive functioning In this research topic we bring together a collection of papers that provide a shot of the current state of the art of theorizing and investigating face perception from the perspective of multiple ability domains We would like to thank all authors for their valuable contributions that advanced our understanding of face and emotion perception across development
