Source Code Meditation Michael Cotton, 2018-05-22 Learn to mobilize latent energy in your body and direct it to energize and awaken your higher brain Provides a simplified step by step guided process to the higher brain activation techniques of Source Code Meditation Explains how to shift energy out of the lower survive brain into the higher thrive brain to bring confidence clarity and empowerment for transformative change in all areas of life Reveals how the brain first techniques of SCM tune the brain to receive meditation enabling access to deep flow states transcendent states of consciousness and higher brain potential The human brain is like a flowing river of potential Until now that river has been blocked barricaded and diverted by the primitive lower brain The lower brain hijacks our ability to experience deeper flow and higher transcendent states of consciousness It also guards against the full expression of the passionate human heart Source Code Meditation SCM with its nine summits of transformation effortlessly re routes that lower brain diversion allowing you to activate latent energy in your body awaken your higher brain enlighten your mind and set your heart on fire to create a new world With traditional meditation techniques it often takes decades of practice for hours each day to confer significant changes in the mind and the higher brain Few of us make it to these rarified states of mind due to the amount of time and the intensity of focus needed With brain first SCM techniques you mobilize latent energy in the body and direct it to energize and awaken the higher brain before meditation begins With the higher brain prepped and tuned meditation is efficiently received leading to quantum breakthroughs in higher consciousness without years of practice as well as access to deep flow states transcendent states of consciousness and higher brain potential Providing a simplified step by step guided process to SCM Dr Michael Cotton explains how to shift energy out of the lower survive brain into the higher thrive brain to bring confidence clarity and empowerment for transformative change in all areas of life Distilled from the world s most comprehensive philosophy Integral Metatheory SCM offers not only a way to create the brain state necessary to change the mind but the crystal clarity needed to use these advanced meditative states to actualize your potential and live your destiny to the fullest

Neuroethics in Principle and Praxis Denis Larrivee, 2019-09-04 With the conclusion of the Decade of the Brain and Decade of the Mind neuroscience has advanced well beyond single neuron functions and begun to investigate global properties that emerge from central nervous system operation Core ethical issues for neural intervention in consequence now touch on concerns over how the individual as a whole may be affected Central to these concerns is the fundamental value of the human being which lends normative weight to questions interventions and practices influencing him or her Yet despite wide recognition of the crucial relevance of human value the derivation of metaethical principles that underwrite this value is by no means uniformly agreed to Why and how the human being is normatively privileged accordingly emerge as core questions that frame issues of ethical praxis This book tackles this dissonance and exposes the philosophical foundations that are rooting contemporary divisions in ethical approaches to intervention in the nervous system *Neural Mechanisms*

Underlying Movement-Based Embodied Contemplative Practices Laura Schmalzl, Catherine E. Kerr, 2016-07-05 Relative to the extensive neuroscientific work on seated meditation practices far less studies have investigated the neural mechanisms underlying movement based contemplative practices such as yoga or tai chi Movement based practices have however been found to be effective for relieving the symptoms of several clinical conditions and to elicit measurable changes in physiological neural and behavioral parameters in healthy individuals An important challenge for neuroscience is therefore to advance our understanding of the neurophysiological and neurocognitive mechanisms underlying these observed effects and this Research Topic aims to make a contribution in this regard It showcases the current state of the art of investigations on movement based practices including yoga tai chi the Feldenkrais Method as well as dance Featured contributions include empirical research proposals of theoretical frameworks as well as novel perspectives on a variety of issues relevant to the field This Research Topic is the first of its kind to specifically attempt a neurophysiological and neurocognitive characterization that spans multiple mindful movement approaches and we trust it will be of interest to basic scientists clinical researchers and contemplative practitioners alike
