Communication, Advocacy, and Work/Family Balance Jenny Dixon, 2017-06-26 This book presents an understanding of work family balance for working adults belonging to a number of different family structures e g single and or childfree adults LGBT couples families with female breadwinners It contends that family structure should serve as a way of thinking about diversity i e race gender age family in the U S workplace It also argues that in addition to accommodations occurring through workplace policy the negotiation of work family balance happens as a result of self advocacy that occurs in everyday communication about family at work Relaying the stories of a number of

different working adults belonging to a variety of different family structures it explores the range of obstacles faced in the attempt at balancing work and family life generates informed ideas for eliminating barriers commonly experienced in balancing work and family and problematizes enduring assumptions regarding gender roles and the myth of steadfast public and private spheres

Beyond Work-Family Balance Rhona Rapoport, 2002 Everyone who struggles to meet the demands of work and personal life responsibilities knows how tough it is to do so This bold new book shows that it is the deeply engrained separation of work and personal life that has limited our ability to deal effectively with the conflict between them Beyond Work Family Balance demonstrates why the image of balance is outmoded and why a new approach work personal life integration offers greater promise for meaningful change Providing many examples from action research projects in more than a dozen organizations of different kinds the authors show how using their method of integrating rather than separating personal life considerations from the workplace can achieve positive outcomes not only for workers but also for the work The method offers a way of looking deeply into the work culture to find inequitable and ineffective work practices that are so embedded and routine that no one thinks to question them³ 4they are just the way things get done Once identified these work practices can be changed to achieve what the authors call a Dual Agenda a more equitable workplace where both men and women can achieve their full potential and a more effective workplace where the needs of the work rather than gendered and outmoded assumptions determine what gets done and how Beyond Work Family Balance offers an approach that achieves what family friendly policies mommy tracks and so called flexibility programs cannot Such programs address the symptoms of the problem This book offers a way of changing the everyday work practices and norms that are at the root of the problem

Balancing Work and Caregiving for Children, Adults, and Elders Margaret B. Neal, 1993-02 Exploring how caregivers juggle their responsibilities of work and family the authors of this volume suggest that dependant care needs to be addressed as a corporate family and community concern Drawing from literature as well as from their own extensive research they present a thorough investigation of the stress factors experienced by workers caught between the frequently conflicting demands of these two roles Policies benefits and services reviewed range from approaches that intervene in the caregiving process to those that change the world of work with such alternatives as flexible working hours child care facilities and tax credits for dependant care

The Art of Balancing Work-Family Conflict Rosern Rwampororo, 2010-05 This book is for all working mothers struggling to find a balance between work and family The enormous increase of women in the labor force especially mothers with young children has led to significant work family conflict This book draws on role theory to explain stress for women as stemming from competing worker and family roles as stressors Traditional gender roles cause stressors which differ for men and women Yet the latter continue to shoulder a disproportionate share of domestic responsibilities as they take on roles as workers The analysis suggests that the effects of stressors or stress can be reduced by drawing on different forms of social support Family childcare support and social networks are used as examples functional

and structural social support respectively The central goal of this book is to demonstrate the positive effect of social support on reducing stressors especially for working women The results show childcare and family support reduced the effects of stressors in both wives and husbands but more so in wives All forms reduced effects of stress on health in husbands more than in wives
