Behavior Modification with Children Richard J. Morris, 1976-01-01 *Behavior Modification with Children* , 1972

Behavior Modification with Exceptional Children Richard J. Morris, 1985 *Severe Behavior Disorders in the Mentally Retarded* Rowland P. Barrett, 2013-11-22 It is well known that behavior problems are a salient characteristic of children and adults with mental retardation That is not to say that all persons with mental retardation experience behavior disorders how ever most studies indicate that the incidence of emotional disturbance in this population is four to six times greater than that observed in similar intellectually nonhandicapped children and adults It is equally well known that the principal form of treatment accorded clients with mental retardation and behavior disorders is pharmacotherapy or the prescription of behavior modifying drugs Recent studies show that 6 out of every 10 individuals with mental retardation have been prescribed drugs as treatment for disorders of emotion or behavior Unfortunately further studies indicate that only one or 2 out of every 10 clients receiving medication are determined to be responders such that some therapeutic benefit is derived from their drug treatment As noted by the title the single major thrust of this volume is to review approaches to the treatment of behavior disorders in persons with mental retardation from a nondrug perspective This requires the presentation of a wide range of material on treatment basic behavior modification programming cognitive behavioral strategies habilitative approaches counseling and psychotherapy designing therapeutic living environments managing medical factors bearing relevance to emotional illness intervening with families training special education teachers and direct care staff and supplying information on the client's rights to obtain treatment in the least restrictive and least intrusive manner **Advances in Clinical Child Psychology** Benjamin Lahey, 2013-11-11 The present volume has been prepared during the International Year of the Child Designation of a special year devoted to children underscores the widespread recognition of the importance of scientific advances and humane concern over the welfare of children Clinical child psychology the topic of the present serial publication is especially important in recognition of the year of the child Clinical child psychology at once combines areas of basic and applied research The subject matter is concerned with understanding the nature of child development and the many influences upon which such development depends Moreover the clinical orientation emphasizes the extension of this research to topics that directly affect the welfare of children and adolescents *Advances in Clinical Child Psychology* publishes scholarly reviews and evaluations of many different areas of research and application In the current volume the third in the series a variety of topics are addressed These include the development of social behavior the emergence and modification of sex typed behavior family systems self help procedures to train parents assessment of intelligence childhood obesity the development and treatment of asthma pediatric psychology treatment of severely disturbed children language development and education of disadvantaged elementary school students New Developments in Behavior Therapy Cyril M. Franks, 1984 Leading experts in the field of behavior therapy review

developments in the field and highlight implications for clinical practice Following a comprehensive overview of behavior therapy by Editor Cyril Franks each chapter provides an in depth review of the pertinent literature and a translation of the findings into ramifications for clinical practice and concludes with an overview of the major indicators and contra indicators for direct application The practicing clinician will find practical relevant chapters on obesity smoking alcohol abuse anxiety depression insomnia and sexual dysfunction The Assessment of Child and Adolescent Personality Howard M.

Knoff,2002-12-31 Now available in paper for the first time this volume brings together leading contributors to provide a comprehensive review of theory research and practice in child and adolescent personality assessment Organized for easy reference the book is divided into four parts Part I summarizes basic theories issues and concepts setting forth a framework for assessment as a hypothesis generating problem solving process Part II describes and evaluates a wide range of relevant approaches tests and techniques marshaling the available data and reviewing administration procedures scoring and interpretation In Part III the process by which personality assessment is translated into effective intervention strategies and programs for children is examined in depth A summary of major perspectives and recommended practices is presented in Part IV which also considers future needs and directions for the field **The Practice of Child Therapy** Richard J.

Morris,Thomas R. Kratochwill,2008 Consistent with previous editions this book assembles in a single volume summaries of the treatment literature and treatment procedures of the most common childhood behavior disorders facing persons who practice in applied settings clinics schools counseling centers psychiatric hospitals and residential treatment centers Its 16 chapters cover the historical context of child and adolescent therapy obsessive compulsive disorders childhood depression childhood fears phobias and related anxieties attention deficit hyperactivity disorder academic problems conduct disorder somatic disorders autism spectrum disorder intellectual disabilities children medically at risk sexual and other abuse of children child and adolescent psychopharmacotherapy prevention and child therapy and the law Key features include Treatment Orientation Although some chapters include a discussion of theoretical issues the primary emphasis is on intervention techniques and strategies for changing various behavior and learning problems Case examples are often used to illustrate treatment procedures Empirical Orientation While most authors have adopted a broad based behavioral or cognitive behavioral orientation they were encouraged to review the entire treatment literature and to construct their presentations on the basis of empirically supported treatment techniques and procedures Psychopharmacotherapy Chapter The chapter on child and adolescent psychopharmacotherapy focuses on psychopharmacological interventions rather than on which drugs should be prescribed for specific behavior or learning problems Author Expertise Each chapter is written by experts who are well qualified to discuss treatment practices for the specific topic under discussion This book is intended for individuals who have entered or plan to enter the mental health profession or such related professions as counseling special education nursing and rehabilitation It is especially useful for individuals taking child and adolescent therapy and

intervention courses and practicum courses Finally it is suitable for persons who work in applied settings including clinics schools counseling centers psychiatric hospitals and residential treatment centers Behavioral Consultation in Applied Settings Thomas R. Kratochwill, John R. Bergan, 2013-11-21 This guidebook has been developed as a skill training package to teach psychologists counselors social workers and other applied mental health professionals a model for the delivery of behavioral interventions through a behavioral consultation approach This training guide is an abridged version of the skills taught as part of a behavioral consultation model As such it is not intended to be an exhaustive program in behavioral consultation Usually consultation skills are taught over a period of several months in university training programs Also the most successful use of the guidebook can be accomplished only with prerequisite training in behavioral analysis and assessment as a method of delivering psychological services Thus individuals using this guidebook should obtain supervised training in this area The book is also designed to accompany Bergan and Kratochwill 1990 Some individuals may have a background in behavioral assessment and intervention In this case the use of this guidebook can provide the user who has not been exposed to the specifics of the behavioral consultation approach valuable information regarding interviewing forms of assessment and intervention Such activities can be extremely useful when incorporated into regular clinical work in applied settings and supplemented with other assessment and intervention methods Given the importance of successful interviewing in applied settings a major clinical tool should be available after careful study of this guidebook

Evidence-Based Interventions for Students with Learning and Behavioral Challenges Richard J. Morris, Nancy Mather, 2008-01-14 This book assembles into one volume summaries of school based intervention research that relates to those who deal on a regular basis with the growing body of students having high incidence learning disabilities and or behavior disorders special educators school psychologists and clinical child psychologists Chapter authors begin with an overview of their topic followed by a brief section on historical perspectives before moving on to the main section a critical discussion of empirically based intervention procedures In those instances where evidence based prescriptions can legitimately be made authors discuss best practices and the conditions e g classroom environment teacher expertise under which these practices are most effective A final section deals with policy issues
