Balance Of Power In Society:

The Balance of Power in Society Frank Tannenbaum, 1969 Power and Society Harold D. Lasswell, 2017-07-05 In *Power and Society* Harold D Lasswell collaborates with a brilliant young philosopher Abraham Kaplan to formulate basic theoretical concepts and hypotheses of political science providing a framework for further inquiry into the political process This is a classic book of political theory written by two of the most influential social scientists of the twentieth century The authors find their subject matter in interpersonal relations not abstract institutions or organizations and their analysis of power is related to human values They argue that revolution is a part of the political process and ideology has a role in political affairs The importance of class both as social fact and social symbol is reflected in their detailed analysis and emphasis on merit rather than rank skill rather than status as keystones of democratic rule The authors note that power is only one of the values and instruments manifested in interpersonal relations it cannot be understood in abstraction from other values Lasswell and Kaplan call for the replacement of power politics both in theory and in practice by a conception in which attention is focused on the human consequences of power as the major concern of both political thought and political action The basic discussions of core concepts in political science make *Power and Society* of continuing importance to scholars government officials and politicians Power and Society Harold D. Lasswell, Abraham Kaplan, 2013-10-15 Produced for unit SSS312 offered by the School of Social Sciences in Deakin University's Open Campus Program

The Balance of Power in Society Frank Tannenbaum, 1946 *The Balance of Power and State Policies* Zhipei Chi, 2021-02-15 This book utilises publicly available materials such as US diplomatic cables leaked about a decade ago to provide an inside look at the regional dynamics between China and its East Asian neighbours It is increasingly important in this field to step out of the echo chamber of the West dominant narratives and to adopt a realistic assessment of the region There is a near consensus that East Asia is the most important region in the 21st century due to the size of its population and economy Nevertheless alarmist predictions about its future stability keep coming from pundits Indeed East Asia in the aftermath of the Cold War might provide the most likely case study for realists to prove their pessimism about inter state relations due to historical rivalries territorial disputes economic competition great power politics and deep rooted realist beliefs among politicians in the region However East Asia has stayed defiant to these Western framings of regional dynamics People interested in East Asia and Chinese foreign policy will find this book useful in furthering their understanding of how China has interacted with other East Asian states in the post Cold War setting in light of tradition regional structure and great power competitions

The Balance of Power Evan Luard, 2016-07-27 This book examines on an analytical basis the system of international relations between 1648 and 1815 It considers the character of the states their principal foreign policy goals and the beliefs that influences their relations The author seeks on this basis to examine the character of the system as a whole in particular how from the proclaimed desire to maintain the balance of power it succeeded in establishing international stability in

preventing the domination of particular states Balance of Power in World History S. Kaufman,R. Little,W. Wohlforth,2007-08-22 The balance of power is one of the most influential ideas in international relations yet it has never been comprehensively examined in pre modern or non European contexts This book redresses this imbalance The authors present eight new case studies of balancing and balancing failure in pre modern and non European international systems **The Balance Of Power** Michael Sheehan,2004-11-11 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company **Cooperative Security and the Balance of Power in ASEAN and the ARF** Ralf Emmers,2012-11-12 Emmers questions the dichotomy implicit in this interpretation and investigates what role the balance of power really plays in such cooperative security arrangements and in the calculations of the participants of ASEAN and the ARF He offers a thorough analysis of the influence the balance of power has had on the formation and evolution of the ASEAN and ARF and reveals the co existence and inter relationship between both approaches within the two institutions The book contains case studies of Brunei s motives in joining the ASEAN in 1984 ASEAN s response to the Third Indochina Conflict the workings of the ARF since 1994 and ASEAN s involvement in the South China Sea dispute It will interest students and researchers of the ASEAN and ARF the international politics of Southeast Asia Regionalism and the Balance of Power theory **The Struggle for Development and Democracy: A General Theory** Alessandro Olsaretti,2023-03-13 In The Struggle for Development and Democracy Alessandro Olsaretti argues that we need significantly new theories of development and democracy to answer the problem posed by neoliberalism and the populist backlash namely uneven development and divisive politics heightened by the 9 11 attacks This volume proposes a general theory of development and democracy as part of a unified theory of power emphasizing that development needs markets civil society and the state and also the proper networks and interactions amongst markets civil society and the state Imperialism undermines these interactions and turns countries into providers of cheap land or labour This book begins to sketch the mechanisms at work and to answer one question how did imperialist elites build their power All royalties from sales of this volume will go to GiveWell org in honour of Alessandro Olsaretti s memory
