Balaton and Its Environs Dezső Keresztury,1978 **Balaton and its Environs** Dezső Keresztury,1978

Landscapes and Landforms of Hungary Dénes Lóczy,2015-03-02 This volume is the first comprehensive description of the most spectacular landforms of Hungary It is a richly illustrated book which presents a collection of significant sites capturing the geodiversity of Hungarian landscapes The Landscapes and Landforms of Hungary discusses the effects of geomorphological features to the landscape such as volcanism weathering fluvial or aeolian erosion karst formation gravitational movements and others The importance of the conservation of geomorphological heritage is underlined as well as the importance of geomorphological heritage and conservation This book can be used for undergraduate and graduate courses in geomorphology physical geography hydrogeography and nature conservation It will be of benefit to environmental scientists geomorphologists conservationists among others **Global Geological Record of Lake Basins: Volume 1** E.

Gierlowski-Kordesch,K. Kelts,2006-11-23 The sequence of sediments deposited in lakes forms an archive of a high resolution record of the changes and rates of changes in continental palaeoenvironments Global Geological Record of Lake Basins is the first in a short series of books containing concise geological summaries of lake basin deposits Geoscientists worldwide have co operated to bring together the information available on a global spectrum of lacustrine deposits looking in particular at palaeoenvironmental aspects The compilation has resulted from IGCP 219 Comparative Lacustrine Sedimentology in Space and Time which has given impetus to the field of limnogeology Lacustrine deposits are widespread throughout the geological record and this series of books will assess for every geological time window key lacustrine sequences worldwide in the form of short summaries of specific deposits A common language will be defined to describe these deposits Geology of the

Carpathian Region G. Z. Földvay,1988 This can be best described as a comprehensive volume as there is no one volume of work done on the geology of the entire Carpathian region It is aimed to pave the way for global geologists to examine this tectonically complex and key area and to build up a clear picture about its origin evolution and structure It provides factual geological material for plate tectonicians to work on and to derive basic information from Since it is intended to be comprehensive it will also be a useful source material for professional geologists and specialists in the earth sciences *The*
