Bananas And Plantains:

Bananas and Plantains John Charles Robinson, Víctor Galán Saúco, 2010 The Crop Production Science in Horticulture series examines economically important horticultural crops selected from the major production systems in temperate subtropical and tropical climatic areas Systems represented range from open field and plantation sites to protected plastic and glass houses growing rooms and laboratories Emphasis is placed on the scientific principles underlying crop production practices rather than on providing empirical recipes for uncritical acceptance Each volume follows a common format covering all aspects of production from background physiology and breeding to propagation and planting through husbandry and crop protection to harvesting handling and storage This volume 2nd edition focuses on bananas and plantains Musa discussing topics on their distribution and importance chapter 1 taxonomic classification cultivars and breeding chapter 2 morphological characteristics and plant development chapter 3 climatic requirements and problems due to climate chapter 4 phenological and physiological responses chapter 5 site selection soil requirements and soil Preparation chapter 6 establishing plantation chapter 7 systems of cultivating bananas and product certifications chapter 8 nutritional requirements chapter 9 water requirements and irrigation chapter 10 horticultural management chapter 11 diseases chapter 12 pests chapter 13 harvesting and fruit handling chapter 14 and ripening biochemistry and uses chapter 15

Bananas and Plantains S. Gowen, 2012-12-06 In a field of mature bananas plants can be seen at all stages of vegetative growth and fruit maturity providing a fascination for anyone who has an interest in growing crops Banana farmers in the tropics can harvest fruit every day of the year The absence of seasonality in production is an advantage in that it provides a continuity of carbohydrate to meet dietary needs as well as a regular source of income a feature that perhaps has been underestimated by rural planners and agricultural strategists The burgeoning interest in bananas in the last 20 years results from the belated realization that Musa is an under exploited genus notwithstanding the fact that one genetically narrow group the Cavendish cultivars supply a major export commodity second only to citrus in terms of the world fruit trade International research interest in the diversity of fruit types has been slow to develop presumably because bananas and plantains have hitherto been regarded as a reliable backyard source of dessert fruit or starch supplying the needs of the household and in this situation relatively untroubled by pests diseases or agronomic problems

Bananas and Plantains John Charles Robinson, Víctor Galán Saúco, 2010 Bananas and plantains are major fruit crops in the tropics and subtropics making a vital contribution to the economies of many countries In the last 15 years substantial changes have occurred in banana production among them the increased importance of fungal and viral diseases and their serious impact on Cavendish export cultivars smallholder plantains and cooking bananas Changes in production systems such as protected greenhouse cultivation organic fair trade and integrated cultivation and their respective certification schemes have also become prominent This book provides an accessi

Bananas and Plantains S Gowen, 1994-12-31 This important book provides a thorough review of the crop from

planting to consumption Each chapter is written by specialists and gives a vital insight into key aspects of this economically important crop The book will be of great value to plant and agricultural scientists and food scientists and technologists
