Behind The Postmodern Facade Architectural Change In Late Twentieth Century America:

Behind the Postmodern Facade Magali Sarfatti Larson, 2018-08-14 Magali Larson's comprehensive study explores how architecture happens and what has become of the profession in the postmodern era. Drawing from extensive interviews with pivotal architects from Philip Johnson who was among the first to introduce European modernism to America to Peter Eisenman identified with a new deconstructionist style she analyzes the complex tensions that exist between economic interest, professional status, and architectural product. She investigates the symbolic awards and recognition accorded by prestigious journals and panels exposing the inner workings of a profession in a precarious social position. Larson captures the struggles around status, place, and power as architects seek to redefine their very purpose in contemporary America. The author's novel approach in synthesizing sociological research and theory proposes nothing less than a new cultural history of architecture. This is a ground-breaking contribution to the study of culture and the sociology of knowledge as well as to architectural and urban history. This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1993 with a paperback edition in 1995. *Behind the Postmodern Facade* Magali Sarfatti Larson, 2024-06-04

Mohammad Gharipour, 2015-08-27 Historiography is the study of the methodology of writing history, the development of the discipline of history, and the changing interpretations of historical events in the works of individual historians. Exploring the historiography of Persian art and architecture requires a closer look at a diverse range of sources including chronicles

historical accounts travelogues and material evidence coming from archaeological excavations The Historiography of Persian Architecture highlights the political cultural and intellectual contexts that lie behind the written history of Persian architecture in the twentieth century presenting a series of investigations on issues related to historiography This book addresses the challenges complexities and contradictions regarding historical and geographical diversity of Persian architecture including issues lacking in the 20th century historiography of Iran and neighbouring countries This book not only illustrates different trends in Persian architecture but also clarifies changing notions of research in this field Aiming to introduce new tools of analysis the book offers fresh insights into the discipline supported by historical documents archaeological data treatises and visual materials It brings together well established and emerging scholars from a broad range of academic spheres in order to question and challenge pre existing historiographical frameworks particularly through specific case studies Overall it provides a valuable contribution to the study of Persian architecture simultaneously revisiting past literature and advancing new approaches This book would be of interest to students and scholars of Middle East and Iranian Studies as well as Architectural History including Islamic architecture and historiography **The Routledge**

Companion to Architectural Pedagogies of the Global South Harriet Harriss, Ashraf M. Salama, Ane Gonzalez Lara, 2022-12-30 The established canon of architectural pedagogy has been predominantly produced within the Northern hemisphere and transposed or imposed across schools within the Global South more often with scant regard for social economic political or ecological culture and context nor regional or indigenous pedagogic principles and practices Throughout the Global South architecture's academic community has been deeply affected by this regime how it shapes and influences proto professionals and by implication architectural processes and outcomes too The Routledge Companion to Architectural Pedagogies of the Global South resituates and recenters an array of pedagogic approaches that are either produced or proliferate from the Global South while antagonizing the linguistic epistemological and disciplinary conceits that under imperialist imperatives ensured that these pedagogies remained maligned or marginalized The book maintains that the exclusionary implications of architectural notions of the orders the canon and the core have served to constrain and to calcify its contents and in doing so imperiled its relevance and impact In contrast this companion of pedagogic approaches serves to evidence that architecture's academic and professional advancement is wholly contingent on its ability to fully engage in an additive and inclusive process whereby the necessary disruptions that occur when marginalized knowledge confronts established knowledge result in a catalytical transformation through which new co created knowledge can emerge Notions of tradition identity modernity vernacularism post colonialism poverty migration social and spatial justice climate apartheid globalization ethical standards and international partnerships are key considerations in the context of the Global South How these issues originate and evolve within architectural schools and curricula and how they act as drivers across all curricula activities are some of the important themes that the contributors interrogate and debate With more than 30 contributions

from 55 authors from diverse regional racial ethnic gender and cultural backgrounds this companion is structured in four sections that capture critique and catalog multifarious marginalized pedagogical approaches to provide educators and students with an essential source book of navigational steers core contestations propositional tactics and reimagined rubrics The Routledge Companion to Architectural Pedagogies of the Global South pioneers a transposable strategy for academics from all disciplines looking to adopt a tested approach to decolonizing the curriculum It is only through a process of destabilizing the hegemonic epistemological and disciplinary frameworks that have long prescribed architecture s pedagogies that the possibility of more inclusive representative and relevant pedagogical practices can emerge

Incorporating Architects Aaron Cayer,2025 By the end of the twentieth century US architecture and engineering firms held more capital than entire countries employed more people than were housed in most cities and rented offices in more nations than comprised the UN Within them architects were designing not single buildings but urban systems including the multinational infrastructures legal codes and financial mechanisms on which those systems came to depend However despite the extraordinary power of these architects their histories remain shrouded in myth and concealed by design This forensic analysis traces a history of architects at one such firm AECOM as they assembled their own multinational corporation and embedded themselves in the operations of American empire after World War II shielding themselves from the instabilities of a postwar political economy Incorporating Architects reveals how architects through their businesses more than their drawings or buildings modulated the political economy gripped the reins of their profession and produced the global injustices that define our neoliberal present **The Culture of Building** Howard Davis,2006-06-08 In this book of thirteen chapters Howard Davis uses historical contemporary and cross cultural examples to describe the nature and influence of these cultures He shows how building cultures reflect the general cultures in which they exist how they have changed over history how they affect the form of buildings and cities and how present building cultures which are responsible for the contemporary everyday environments may be improved Jacket

Assembling the Architect George Barnett Johnston,2020-01-23 Assembling the Architect explores the origins and history of architectural practice It unravels the competing interests that historically have structured the field and cultivates a deeper understanding of the contemporary profession Focusing on the period 1870 to 1920 when the foundations were being laid for the U S architectural profession that we recognize today this study traces the formation and standardization of the fundamental relationships among architects owners and builders as codified in the American Institute of Architects very first Handbook of Architectural Practice It reveals how these archetypal roles have always been fluid each successfully redefining their own agency with respect to the others in the constantly shifting political economy of building Far from being a purely historical study the book also sheds light on today s digitally enabled profession Contemporary architectural tools and disciplinary ideals continue to be shaped by the same fundamental tensions and emergent modes of practice such as BIM Building Information Modelling

and IPD Integrated Project Delivery represent the realization of programs and agendas that have been over a century in play Essential reading for professional practice courses as a contextual and historical companion to the Handbook Assembling the Architect provides a critical perspective of the profession that is fundamental to understanding current architectural practice

Why Architects Matter Flora Samuel, 2018-03-09 Why Architects Matter examines the key role of research led ethical architects in promoting wellbeing sustainability and innovation It argues that the profession needs to be clear about what it knows and the value of what it knows if it is to work successfully with others Without this clarity the marginalization of architects from the production of the built environment will continue preventing clients businesses and society from getting the buildings that they need The book offers a strategy for the development of a twenty first century knowledge led built environment including tools to help evidence develop and communicate that value to those outside the field Knowing how to demonstrate the impact and value of their work will strengthen practitioners ability to pitch for work and access new funding streams This is particularly important at a time of global economic downturn with ever greater competition for contracts and funds driving down fees and making it imperative to prove value at every level Why Architects Matter straddles the spheres of Practice Management and Law History and Theory Design Housing Sustainability Health Marketing and Advice for Clients bringing them into an accessible whole The book will therefore be of interest to professional architects architecture students and anyone with an interest in our built environment and the role of professionals within it Fallout Shelter David Monteyne, 2013-11-30 In 1961 reacting to U S government plans to survey design and build fallout shelters the president of the American Institute of Architects Philip Will told the organization s members that all practicing architects should prepare themselves to render this vital service to the nation and to their clients In an era of nuclear weapons he argued architectural expertise could preserve us from decimation In Fallout Shelter David Monteyne traces the partnership that developed between architects and civil defense authorities during the 1950s and 1960s Officials in the federal government tasked with protecting American citizens and communities in the event of a nuclear attack relied on architects and urban planners to demonstrate the importance and efficacy of both purpose built and ad hoc fallout shelters For architects who participated in this federal effort their involvement in the national security apparatus granted them expert status in the Cold War Neither the civil defense bureaucracy nor the architectural profession was monolithic however and Monteyne shows that architecture for civil defense was a contested and often inconsistent project reflecting specific assumptions about race gender class and power Despite official rhetoric civil defense planning in the United States was ultimately a failure due to a lack of federal funding contradictions and ambiguities in fallout shelter design and growing resistance to its political and cultural implications Yet the partnership between architecture and civil defense Monteyne argues helped guide professional design practice and influenced the perception and use of urban and suburban spaces One result was a much maligned bunker architecture which was not so much a particular style as a philosophy of building and urbanism that shifted focus from

nuclear annihilation to urban unrest **Cultural Identity in Transition** Jari Kupiainen, Erkki Sevänen, John Stotesbury, 2004 Cultural Identity In Transition Analyses The Challenges That Globalisation And Modernisation Have Brought To Cultural Identity In Recent Years This Collection Of Articles Highlights Some Of The Central Theoretical Ideas And Models Currently Used In The Analysis Of Cultural Identity In The Social And Cultural Sciences While The Book S Main Regional Focus Is On Northern Europe This Is Complemented By Several Case Studies Addressing Issues Of Cultural Identity In Indigenous And Ethnic Communities In Literary And Artistic Expression And In Terms Of National Politics Around The World The Book Discusses In Detail The Questions Like What Is At Stake In The Global Culture Industry In Terms Of Cultural Identity How Do The Internet And Information Technology In General Empower Local Communities What Kinds Of Political Struggles And Conflicts Can Be Associated With The Processes Of Cultural Identity Cultural Identities Are In Transition But In What Direction Are They Moving Cultural Identity In Transition Will Be Essential Reading For University Students And Researchers In Sociology Anthropology And Cultural And Literary Studies
