Bread Men Charles Davies,1987 *The Making of the Modern Supermarket* Bridget Salmon,Andrew Godley,2025-06-04 The Making of the Modern Supermarket describes the emergence and growth of the modern supermarket format in Britain showing how the original American innovation of self service was adapted to the different postwar British context in a number of ways During the early 1960s various retailers began to experiment with larger formats which became known as supermarkets Sainsbury s was a late mover into self service but began to develop a different supermarket model emphasising fresh foods and perishable goods This led it to pursue a more expensive path of development as it invested in self service creating its novel supermarket format by the end of the 1960s The book explores in detail how this Sainsbury s format evolved It was driven by the company s historic commitment to selling fresh meat and other perishable goods which demanded a much greater commitment to refrigeration in Sainsbury s self service format than was the case for its peers Because most consumers were suspicious of buying fresh meat and perishables through self service outlets in the early 1960s Sainsbury s also had to retain high levels of staffing to support their self service offering During the 1960s as they extended their product range they facilitated the development of one stop shopping in the UK where customers were able to buy all their food requirements in one shop rather than shopping around This became the most popular version of the supermarket format and it was the template that others copied as they tried to follow Sainsbury s example [The Making of Global Enterprises](#) Geoffrey Jones,2020-07-24 This volume provides new insights to the history of international business The international group of authors drawn from the United States Canada Britain and Japan address two main themes How has global business developed over the last century And what has been its impact on host economies These original and wide ranging essays prefaced by an extensive editorial introduction are required reading in courses on international business
