Career Development in Childhood and Adolescence, 2007-01-01 In the past few years many career theorists have noted the dearth of literature in the area of career development in childhood and adolescence. A growing need for integrating theory and research on the early stages of vocational development within a systemic life span developmental approach has been articulated. This volume the first book dedicated to career development of children and adolescents provides a broad and comprehensive overview of the current knowledge about the key career processes that take place in this age group. Each of the eighteen chapters represents an in depth examination of a specific aspect of career development with a focus on integrating modern career theory and ongoing research and further developing theory practice connections in understanding child and adolescent career behaviour. Twenty six authors leading experts from eight countries provide a state of the art summary of the current thinking in the field and outline directions for future empirical work and practice

Growing Up and Out of Crime Elias Nader, 2024-02-23 Developmental norms and expectations for young people aged 18-25 have diverged from previous generations creating a new stage in the life course called Emerging Adulthood. Theory surrounding this stage of emerging adulthood emphasizes a delay in achieving turning points into adulthood that are typical of this age group. These delays in turn affect how maturation can influence the desistance from crime. Utilizing evidence from the narratives of justice involved emerging adults this book details key turning points for today's young person trying to desist from crime. Building on evidence from researchers and theorists as well as from the author's own narrative interviews this book provides a brief and approachable review of the extant literature summarizing work across the fields of developmental psychology, sociology and criminology to provide the reader with an understanding of the maturation of young people in their late teens and 20s before concluding with considerations for policy and practice building from this evidence. *Growing Up and Out of Crime* is perfect for students, scholars and academics who study youth, young adults and their maturation, deviance and desistance as well as for practitioners working with young people engaging in desistance

Adolescents, Work, and Family Jeylan T. Mortimer, Michael D. Finch, 1996 What does an adolescent really learn about adult responsibilities from holding

down a paying job or doing household chores Does a teenager's employment lead to change in the family Based on an 8 year study *Adolescents Work and Family* examines how adolescents work experiences both within the home and in the paid work force affect their relationship with their parents their self concepts and their well being This book is unique in that it studies not only working adolescents but their parents as well Among their findings the contributors reveal the importance of work quality and context in developing youth competence the similarity between parents and children in their perceptions of the benefits and costs of youth work how paid work can contribute to positive family relationships how positive work experiences can buffer the adolescent from stressful family problems and how an adolescent's work plans influence their early transition to adulthood In addition the book offers readers directions for future research in this growing area of inquiry Acquiring and maintaining work is a marker of the adolescent's transition to adulthood Thus scholars of adolescent and family development youth and family policymakers and professionals who help youths and their families will find the book's revelations important and useful This book is timely and is much needed to help clarify an understanding of the impact of work on adolescents and their families It is the first to draw together a detailed analysis of intergenerational ties to work while maintaining a focus on adolescents Moreover a myriad of complex issues including work and development work as an arena of comfort and the meaning of work for adolescents and their parents are examined over time for a representative yet situated sample While there are competing books Jeylan T Mortimer and Michael D Finch's volume is really the first to provide a highly detailed analysis over time Kathryn M Borman University of South Florida *Children of the Land* Glen H. Elder Jr., Rand D.

Conger, 2014-10-01 A century ago most Americans had ties to the land Now only one in fifty is engaged in farming and little more than a fourth live in rural communities Though not new this exodus from the land represents one of the great social movements of our age and is also symptomatic of an unparalleled transformation of our society In *Children of the Land* the authors ask whether traditional observations about farm families strong intergenerational ties productive roles for youth in work and social leadership dedicated parents and a network of positive engagement in church school and community life apply to three hundred Iowa children who have grown up with some tie to the land The answer as this study shows is a resounding yes In spite of the hardships they faced during the agricultural crisis of the 1980s these children whose lives we follow from the seventh grade to after high school graduation proved to be remarkably successful both academically and socially A moving testament to the distinctly positive lifestyle of Iowa families with connections to the land this uplifting book also suggests important routes to success for youths in other high risk settings **Handbook of Life-Span Development**

The Place of Work in African Childhoods Bourdillon, Michael, Mutambwa, Georges M., 2015-10-19 This book is about how work enters and affects the lives of children in Africa taking for granted neither the traditional values surrounding children s work nor the international standards against it Many African societies nurture their children on the ingrained notion that children must work as part of their process of growing up Children participate in their families and

communities through the work they do in the house and in whatever else their families do. Such views are however antithetical to the dominant views in Europe and North America which see childhood as a time of freedom from responsibility and economic activity. These views have become so popular with the elites in other countries to the extent that they now drive international campaigns against child labour and have been incorporated into what are now considered universal international standards and conventions. This book was conceived within the framework of the CODESRIA tradition of taking African perspectives seriously and not allowing social research in Africa to become subservient to values from outside. African scholars remain keenly aware of the need not to isolate themselves from developments in the wider world which could lead to stagnation. This book through empirical observation of the lives of African children, the work they do, its place in their lives and what the children say about it, proposes new perspectives towards a new understanding of this complex stage of human development. Work is not simply about the right to income; work provides identity and status in society and participation in the community. People relate to one another through work. Those who do not work are often without status and are at the periphery of society. One of the major ways in which this book differs from most of the available literature is in the understanding it brings to the problem of child labour. There are economic reasons why children may need an income of their own. There is the demographic fact that the proportion of children to adults in low income countries is nearly double that in high income societies. This book attempts to demonstrate that work is both necessary and beneficial in terms of a child's development to become a full responsible and respectable member of society.

Social Participation in Occupational Contexts Marilyn B. Cole, Mary V. Donohue, 2011. Social participation naturally occurs in everyday life in combination with daily occupations such as when people interact while eating, playing, carpooling and working. This book provides information on social participation for different occupations.
