Anesthesia For Obstetrics Third Edition:

Shnider and Levinson's Anesthesia for Obstetrics Maya Suresh, 2013-01-30 Now in a fully updated Fifth Edition Shnider and Levinson's Anesthesia for Obstetrics continues to provide the comprehensive coverage that has made it the leading reference in the field. The rising number of Cesarean births and the more advanced age of first time mothers in the United States have brought with them an increased risk for complications making the role of the obstetric anesthesiologist increasingly important. This comprehensive reference addresses maternal and fetal physiology, fetal assessment, anesthesia and analgesia in both vaginal and Cesarean delivery, neonatal well being, management of fetal, maternal and anesthetic complications and management of coexisting disorders in the mother. The Fifth Edition includes a new editorial team, a new full color format and new sections on Assessment of the Fetus, Anesthesia for Cesarean Delivery, Neonatal Well Being, Old and New Concepts, Ethical, Medical and Social Challenges and Issues, Maternal Safety, Difficult and Failed Intubation, Morbidity and Mortality and Anesthetic Considerations for Reproductive In Utero and Non Obstetric Procedures. Anesthetic and Obstetric Management of High-Risk Pregnancy Sanjay Datta, 2006-04-29 It has been enormously satisfying to prepare the third edition of Anesthetic and Obstetric Management of High Risk Pregnancy because it fulfills the need for close communication between two specialties, anesthesiology and obstetrics. This relationship is necessary not only to take care of the sick parturient but also to deliver a healthy baby. New developments in obstetrics and in obstetric anesthesia necessitated this third edition. Most of the contributors to this edition are new and they have provided information on the latest approaches as well as updated information. In addition, Chapter 13, Critical Care Anesthesia for High Risk Parturients is completely new. Like earlier editions, the third edition includes contributions from an international team of experts in the field of obstetric anesthesia and obstetrics. I thank all the authors for their valuable contributions. The authors have expressed their own opinions and recommendations which do not necessarily reflect my own views. I also wish to thank Ms Elizabeth Kiernan for her endless help in completing the new edition. I sincerely hope this edition will further reinforce the concept of the team approach for taking care of the high risk parturient. Anesthetic and Obstetric Management of High-Risk Pregnancy Sanjay Datta, 2004-01-09 This is the 3rd edition of a classic text which still represents the only multi disciplinary approach to the evaluation and management of a high risk pregnancy. Since most chapters are written by a 2 author team, an anesthesiologist and an obstetrician or fetologist, information will be efficiently formatted, practical and complete. Coverage will include causes of the health risk, pathophysiology, obstetric treatment, written by an obstetrician and anesthetic management, written by an obstetric anesthesiologist. Chapters will include the latest procedures and most advanced technology. They will cover the parameters used to observe fetal well being and deal with abnormal findings regardless of the stage of development. Topics will extend through the delivery and post delivery periods.
