Animal Remains in Archaeology Rosemary-Margaret Luff, 1984 **The Study of Animal Bones from Archaeological Sites** Raymond Edwin Chaplin, 1971 Non Aboriginal material *The Archaeology of Animals* Simon J. M. Davis, 2012-11-12

Ever since the discovery of fossil remains of extinct animals associated with flint implements bones and other animal remains have been providing invaluable information to the archaeologist In the last 20 years many archaeologists and zoologists have taken to studying such archaeofaunal remains and the science of zoo archaeology has come into being What was the nature of the environment in which our ancestors lived In which season were sites occupied When did our earliest ancestors start to hunt big game and how efficient were they as hunters Were early humans responsible for the extinction of so many species of large mammals 10 20 000 years ago When where and why were certain animals first domesticated When did milking and horse riding begin Did the Romans influence our eating habits What were sanitary conditions like in medieval England And could the terrible pestilence which afflicted the English in the seventh century AD have been plague These are some of the questions dealt with in this book The book also describes the nature and development of bones and teeth and some of the methods used in zoo archaeology

Identifying and Interpreting Animal Bones April M. Beisaw, 2013-11-21 Offering a field tested analytic method for identifying faunal remains along with helpful references images and examples of the most commonly encountered North American species Identifying and Interpreting Animal Bones A Manual provides an important new reference for students avocational archaeologists and even naturalists and wildlife enthusiasts Using the basic principles outlined here the bones of any vertebrate animal including humans can be identified and their relevance to common research questions can be better understood Because the interpretation of archaeological sites depends heavily on the analysis of surrounding materials soils artifacts and floral and faunal remains it is important that non human remains be correctly distinguished from human bones that distinctions between domesticated and wild or feral animals be made correctly and that evidence of the reasons for faunal remains in the site be recognized But the ability to identify and analyze animal bones is a skill that is not easy to learn from a traditional textbook In Identifying and Interpreting Animal Bones veteran archaeologist and educator April Beisaw guides readers through the stages of identification and analysis with sample images and data also illustrating how specialists make analytical decisions that allow for the identification of the smallest fragments of bone Extensive additional illustrative material from the author s own collected assemblages and from those in the Archaeological Analytical Research Facility at Binghamton University in New York are also available in the book s online supplement There readers can view and interact with images to further understanding of the principles explained in the text
