Architectural House:

House architecture John James Stevenson, 1880 **Houses from Books** Daniel D. Reiff, 2010-11-01 Many homes across America have designs based on plans taken from pattern books or mail order catalogs In *Houses from Books* Daniel D. Reiff traces the history of published plans and offers the first comprehensive survey of their influence on the structure and the style of American houses from 1738 to 1950 *Houses from Books* shows that architectural publications from Palladio's *I Quattro Libri* to Aladdin's Ready Cut Homes played a decisive role in every aspect of American domestic building Reiff discusses the people and the firms who produced the books as well as the ways in which builders and architects adapted the designs in communities throughout the country His book also offers a wide ranging analysis of the economic and social conditions shaping American building practices As architectural publication developed and grew more sophisticated it played an increasingly prominent part in the design and the construction of domestic buildings In villages and small towns which often did not have professional architects the publications became basic resources for carpenters and builders at all levels of expertise Through the use of published designs they were able to choose among a variety of plans styles and individual motifs and engage in a fruitful dialogue with past and present architects *Houses from Books* reconstructs this dialogue by examining the links between the published designs and the houses themselves Reiff's book will be indispensable to architectural historians architects preservationists and regional historians Realtors and homeowners will also find it of great interest A catalog at the end of the book can function as a guide for those attempting to locate a model and a date for a particular design *Houses from Books* contains a wealth of photographs many by the author that enhance its importance as a history and guide

"God's Own Junkyard": Architecture and the Built Environment in American Suburban Fiction Stefanie

Strebel, 2021-06-28 The American suburb is a space dominated by architectural mass production sprawl as well as a monotonous aesthetic eclecticism and many critics argue that it has developed from a postwar utopia into a disorienting environment with which it is difficult to identify The typical suburb has come to display characteristics of an atopia that is a space without borders or even a non place a generic space of transience Dealing with the representation of architecture and the built environment in suburban literature and film from the 1920s until present this study demonstrates that in its fictional representations too suburbia has largely turned into a place of non architecture A lack of architectural ethos and an abundance of Junkspace define suburban narratives causing an increasing sense of disorientation and entropy in fictional characters American Architect and the Architectural Review, 1902 Inventing the New American House Stuart Cohen, 2015-04-14 Howard Van Doren Shaw designed stately country houses in and around Chicago from affluent Lake Forest Illinois and Lake Geneva Wisconsin to Iowa Minnesota Ohio and Indiana from 1894 to 1926 a period in American architecture that spanned the Gilded Age the adoption of Beaux Arts classicism as the ideal for civic architecture the invention of the skyscraper and the beginning of modernism Born in 1869 he worked for the leading industrialists of that period including Reuben H Donnelley of printing fame newspaper giant Joseph Medill Patterson Edward Forster Swift the meatpacking king and Edward L Ryerson of Ryerson Steel A contemporary of Frank Lloyd Wright Shaw explored many of the same ideas as the Prairie School Architects within the forms of traditional architecture Though he was recognized as one of the leading country house architects of the early twentieth century his name was largely forgotten after his death Like many traditional architects practicing today Shaw was skilled at adapting historic precedents to suit contemporary living in particular the easy flow of interior space that became a design hallmark of the period for traditionalists and modernists alike For the new and fashionable suburb of Lake Forest Shaw created Market Square the town center which was lauded for its design as both a unique town green and the first American shopping center designed to accommodate automobiles This timely reappraisal of Howard Van Doren Shaw s work features many previously unpublished images from the Shaw Archive in the Burnham and Ryerson Library at the Art Institute of Chicago and the Chicago History Museum rare construction drawings and new color photography as well as a catalogue of Shaw s residential work His legacy includes substantial houses in prosperous communities many of which are still standing including Ragdale once Shaw s own summer house in Lake Forest now home to the prestigious artists community the Becker Estate on Chicago s North Shore and The Hermann House overlooking Lake Michigan *Design and Plan in the Country House* Andor Harvey Gomme, Austin Harvey Gomme, Alison Maguire, Maguire Alison, 2008-01-01 The way a man thinks about his day to day living and the needs of his household reveals a great deal about his ambitions his idea of himself and his role in the community And his house or castle offers many clues to his habits as well as those of the members of his household This intriguing book explores the evolution of country house

plans throughout Britain and Ireland from medieval times to the eighteenth century With photographs and detailed architectural plans of each house under discussion the book presents a whole range of new insights into how these homes were designed and what their varied designs tell us about the lives of their residents Starting with fortified medieval tower houses the book traces patterns that developed and sometimes repeated in country house design over the centuries It discusses who slept in the bedchambers where food was prepared how rooms were arranged for official and private activities what towers signified and more Groundbreaking in its depth the volume offers a rare tour of country houses for scholar and general reader alike The American Architect and the Architectural Review ,1922 *Architect and Engineer* ,1920
