Arguing Constructively

William L. Benoit, Dale Hample

Arguing Constructively:

Arguing Constructively Dominic A. Infante, 1987-12-01 A refreshing fusion of interpersonal human relations and argumentation This clear and engaging volume is unique because of its dual focus On the one hand the purpose is to instruct on the methods of argumentation theory This represents a set of principles methods and strategies of argument that have evolved from the time of Ancient Greece On the other hand the intent is to teach human relations in argumentative situations specifically how to manage interpersonal relations during arguments Books on argumentation and debate have tended to say little about how arguing can affect the relationship one has with an adversary How do you prevent harm to a valued friendship for instance Moreover books on interpersonal communication have had little to say about arguing Instead the emphasis is on achieving satisfying relations with others The author shows that recent research makes it clear that argumentation and interpersonal communication are complementary areas of communication Arguing constructively in informal interpersonal and small group contexts is a skill that can bring about good outcomes Instruction on building and maintaining satisfying relations with other people is lacking if it does not deal with how to do this while arguing especially since argumentative communication probably will occur throughout a relationship This book has been written to correct what has been perhaps too narrow a focus in the areas of argumentation and interpersonal communication

Making Great Strategy Glenn R. Carroll, Jesper B. Sørensen, 2021-01-26 Making strategy requires undertaking major often irreversible decisions aimed at long term success in an uncertain future All leaders must formulate a clear course of action yet many lack confidence in their ability to think systematically about their strategy They struggle to apply the abstract lessons offered by conventional approaches to strategic analysis to their unique contexts Making Great Strategy resolves these challenges with a straightforward readily applicable framework Jesper B Sørensen and Glenn R Carroll show that one factor underlies all sustainably successful strategies a logically coherent argument that connects resources capabilities and environmental conditions to desired outcomes They introduce a system for formulating and managing strategy through a set of three core activities visualization formalization and logic and constructive argumentation These activities can be implemented in any organization and are illustrated through examples and case studies from well known companies such as Apple Walmart and The Economist This book shows that while great strategic thinking is hard it is not a mystery Widely applicable and relevant for managers and leaders at all levels especially executive teams charged with setting the course of their organizations it is essential reading for anyone faced with practical problems of strategic management

Concreteness and Specificity in Clinical Psychology Luciano L'Abate, 2015-04-10 This provocative volume updates L'Abate's signature ideas focusing in particular on the concepts of concreteness and specificity as basic tenets of evaluation and therapy Noting society's growing familiarity with technology current concerns about treatment accessibility and widespread interest in wellness promotion he argues for remote writing exercises targeted to specific client issues and monitored by the clinician instead of relying on

traditional talk based therapy This attention to concreteness and specificity in baseline evaluation post treatment evaluation and follow up the author asserts is central to making treatment replicable less subject to impasses or missteps and more professional with the potential of changing how therapy is conducted as well as how clinicians are trained and practice The book s framework includes rationales models empirical data and examples of prescriptive remote writing exercises Featured in the coverage Online interventions here to stay and to grow Verifiability in clinical psychology practices Present status and future perspectives for personality and family assessment Practice without theory combining theory with practice Toward a unifying framework of human relationships PIPES Programmed Interactive Practice Exercise and Prescriptions Concreteness and Specificity in Clinical Psychology will bring a new level of discussion and debate among clinical psychology practitioners and practicing psychotherapists in private practice and the public sector

Perspectives on Argumentation Robert Trapp, Janice E. Schuetz, 2006 Wayne Brockriede s contribution to studies of argumentation continues to influence contemporary research Perspectives on Argumentation identifies the pertinent theories and contemporary applications on which students can build their own skills of reasoning and can understand the argument practices of others Book jacket

Handbook of Communication and Social Interaction Skills John O. Greene, Brant Raney Burleson, 2003 A comprehensive handbook covering social interaction skills skill acquisition in the context of personal professional and public stages For scholars students in interpersonal group family health communication Arguments and Arguing Thomas A. Hollihan, Kevin T. Baaske, 2015-11-17 The latest edition of Arguments and Arguing contains the same balance of theory and practice breadth of coverage current and relevant examples and accessible writing style that made previous editions so popular in hundreds of classrooms The authors draw from classic and recent argumentation theory and research contextualized with well chosen examples to showcase a narrative style of argumentation and the values and attitudes of audiences Readers learn how to employ both formal and informal argumentative strategies in an array of communication forums from interpersonal interactions to academic debate to politics to business A newly added chapter on visual argumentation and a striking color photo insert demonstrate the value and power of visual elements in the construction of arguments The ability to argue is necessary if people are to solve problems resolve conflicts and evaluate alternative courses of action While many are taught that arguing is counterproductive and arguments should be avoided Hollihan and Baaske illustrate that arguing is an essential and fundamental human activity Learning the art of effective argumentation entails a grasp of not only the strategies and principles of analysis and logical reasoning but also the importance of arguing in a positive and socially constructive fashion *Descartes M. Glouberman, 1986 "Lover's Rejection" A guide to get him or her back without going crazy* Robert Dean Larsen,
