Argument And Audience:

The Philosophy of Argument and Audience Reception Christopher W. Tindale, 2015-04-30 Recent work in argumentation theory has emphasized the nature of arguers and arguments along with various theoretical perspectives Less attention has been given to the third feature of any argumentative situation the audience This book fills that gap by studying audience reception to argumentation and the problems that come to light as a result of this shift in focus Christopher W Tindale advances the tacit theories of several earlier thinkers by addressing the central problems connected with audience considerations in argumentation problems that earlier philosophical theories overlook or inadequately accommodate The main tools employed in exploring the central issues are drawn from contemporary philosophical research on meaning testimony emotion and agency These are then combined with some of the major insights of recent rhetorical work in argumentation to advance our understanding of audiences and suggest avenues for further research Argument and Audience Kenneth T. William L. Benoit, Dale Hample, 1992 In this volume emphasis is placed on contributions to the study of argumentation by scholars from communication speech communication rhetoric and discourse analysis So far their work has been insufficiently represented in anthologies overviews and readers William Benoit Dale Hample and Pamela Benoit have made efforts to correct the imbalance by filling in the gap In our opinion they have succeeded in compounding an excellent selection of classical highlights from modern literature in the field For scholars the books provides a rich source of information and references Pref p xi xii

US Counter-terrorism Strategy and Al-Qaeda Joshua A. Geltzer, 2009-09-10 This book examines the communicative aspects and implications of US counter terrorist policies towards al Qaeda Recent US counter terrorist strategy has been largely based upon projecting certain perceptions of America as an actor to those drawn to al Qaeda and this book investigates in what ways and to what extent US officials believed that the signals sent by what America did and said could influence the behaviour of the terrorist and would be terrorist The study then draws on a growing understanding of that audience to analyse how those drawn to al Qaeda were and indeed still are likely to be influenced by the perceptions of America that Washington s policies generated The study s central argument is that given al Qaeda s unconventional strategy and the particularities of the world view characterising those drawn to the group America s counter terrorist signalling proved largely counter productive to America s objective of undermining al Qaeda s strategic narrative instead serving in many ways to validate it Firstly this book seeks to reveal the significant and largely unexplored role that signalling has played in US counter terrorist policy towards al Qaeda Second it tries to capture the objectives strategy tactics ideology and other defining features of the world view characterising those drawn to al Qaeda Third it strives to combine those two lines of inquiry by applying the al Qaeda world view to a critical analysis of the signals sent by US policies Finally the book aims to offer broad policy implications that demonstrate how an informed understanding of the world view of those drawn to al Qaeda can be employed to revise and refine American counter terrorist signalling This book will be of much interest to students of US foreign policy and public diplomacy counter terrorism strategy and international security Joshua Alexander Geltzer has a PhD in War Studies from Kings College London and is currently a juris doctoral student at Yale Law School

Rhetorical Audience Studies and Reception of Rhetoric Jens E. Kjeldsen, 2017-11-10 This book examines the reception of rhetoric and the rhetoric of reception By considering salient rhetorical traits of rhetorical utterances and texts seen in context and relating this to different kinds of reception and or audience use and negotiation the authors explore the connections between rhetoric and reception In our time new media and new forms of communication make it harder to distinguish between speaker and audience The active involvement of users and audiences is more important than ever before This project is based on the premise that rhetorical research should reconsider the understanding conceptualization and examination of the rhetorical audience From mostly understanding audiences as theoretical constructions that are examined textually and speculatively the contributors give more attention to empirical explorations of actual audiences and users The

book will provide readers with new knowledge on the workings of rhetoric as well as illustrative and guiding examples of new methods of rhetorical studies
