Aristotle's philosophy primarily because the doctrine of the Unmoved Mover is nowhere else set forth in greater detail. Not only all the forty-two formerly known Greek codices have been collated but also commentaries and translations. Moreover a hitherto undiscovered independent manuscript representing a tenuous and particularly valuable branch of the direct tradition is minutely investigated. The document in question preserved in the Vatican is an autograph of the Byzantine humanist and Ecumenical Patriarch Gennadios II Scholarios.

Skepticism in the Modern Age José Raimundo Maia Neto, Gianni Paganini, John Christian Laursen, 2009. Since the publication of the first edition of Richard Popkin's classic *The History of Scepticism* in 1960 skepticism has been increasingly recognized as a major force in the development of early modern philosophy. This book provides a review of current scholarship and significant updated research on some of the main thinkers and issues related to the reappraisal of ancient skepticism in the modern age. Special attention is given to the nature, importance, and relation to religion of Montaigne's and Hume's skepticisms to the various skeptical and non-skeptical sources of Cartesian doubt to the skeptical and anti-skeptical impact of Cartesianism in the seventeenth and eighteenth centuries and to philosophers who dealt with skeptical issues in the development of their own various intellectual interests.

Philosophy Hans E. Bynagle, 2006-05-30. A newly reorganized up-to-date overview of key reference works in philosophy reflects a veritable explosion of reference sources both print and online published over the past decade. Nearly 300 of the 700 entries consist of new material with an additional 50 entries substantially revised and updated. English language sources are emphasized but important non-English works are also well represented. For professional philosophers, philosophy educators, students from beginning to graduate, and librarians. This guide represents a substantial updating and complete reorganization of the author's 1997 *Philosophy: A Guide to the Reference Literature*. 2nd edition, 1st edition 1986. It reflects a veritable explosion of reference sources both print and online in the field of philosophy over the past decade. Nearly 300 entries or 40 percent are entirely new. An additional 50 or so entries have substantial revisions recording new editions, changes in serial publications, series, and websites, or additional volumes completed in multi-volume sets. In addition, it has been entirely reorganized along topical lines. Each of its twenty-three chapters is divided into four sections: 1. general sources, 2. history of philosophy, 3. branches of philosophy, and 4. miscellanea. This new arrangement accords better with the greatly expanded range of philosophy reference sources and makes it easier for the user to identify related sources of different types: bibliographies, dictionaries, web gateways, etc. on the same topic. Like its predecessor *Guide to Reference Sources in Philosophy*, the 3rd edition aims to serve a diverse audience of professional philosophers, philosophy educators, students from beginning to graduate, and librarians. All entries include generous annotations that are often evaluative as well as descriptive. English language sources are emphasized but non-English works important to researchers or of interest to users with facility in other languages are also well represented.

Metaphysics Mirjam Kotwick, 2016 Alexander of Aphrodisias's commentary about AD 200 is the earliest extant commentary on Aristotle's Metaphysics and the most important indirect witness to the Metaphysics text In this study Mirjam Kotwick demonstrates how to reconstruct from Alexander's commentary the Metaphysics text Alexander used and how to make use of this ancient version of the Metaphysics for improving the text of our direct manuscript tradition Moreover Kotwick investigates how Alexander's commentary may have influenced the transmission of the Metaphysics at various stages Kotwick's study is the first book length examination of a commentary as a witness to an ancient philosophical text This blend of textual criticism and philosophical analysis both expands on existing methodologies in classical scholarship and develops new ones
