

# BASIC NEWS WRITING

The ABCs of news writing are Accuracy, Brevity and Clarity.

The first and most important is accuracy -- a story can be creative and compelling, but if it contains errors, it is worthless.

Actually, it is worse than worthless; a false news story undercuts the public trust necessary for the survival of a free press. Keep in mind that the First Amendment specifically protects the press from government control so that the public can receive accurate and unbiased information. The public needs unbiased information to make intelligent choices in the voting booth. This is critical to the process of democracy in our country. If the public loses faith in the accuracy and fairness of the press, loss of faith in democracy will soon follow.

Always check numbers, spellings of names, who said what, and the other basic facts of any story. A reporter's job is to find out what is going on, then write a story that's interesting and informative. Accuracy always comes first.

Second is brevity. Each word in your story should do a job. If not, take it out. Get to the point. Say it just once. Don't be redundant. Don't say "**8 a.m. in the morning.**" since 8 a.m. *is in the morning*. Just say 8 a.m. Or say 8 in the morning. Remember the inverted pyramid style of writing. Put the most important fact in the lead. Hook the reader's attention. Explain the lead and then go on to the next most important fact in the second inverted pyramid. And then the next. Lead up to an interesting finish. Don't just stop writing when you run out of information.

Clarity starts before you write. Clarity starts with complete, competent reporting. You should understand your subject so completely that your story leaves it crystal-clear in the reader's mind. Your story should leave no questions unanswered. Avoid jargon. Explain anything that

wouldn't be obvious to the average person. The more information you gather, the more you have to sift through to determine what belongs in the lead. The more you know, the harder it is to tell it quick and make it simple. It's only easy if you don't know what you're talking about. No one said good reporting is easy.

## THE GATEKEEPER

Who decides what stories will be printed in the Monitor? Who picks the stories for the 10 O'Clock News on Channel 2? Journalists make those decisions, and when they do, they are performing their "gatekeeper" function. They decide which stories to let through the "gate" and which to toss into the trash.

Journalists decide which stories are important enough to run on page one, and which ones run inside.

But the gatekeeper function also affects the way we write our stories. The reader looks to the journalist to make sense out of a confusing world. It is the journalist's job to find out what's going on, then choose from a notebook full of scribbles only those facts necessary to give the reader a clear, concise picture of the most important events. Obviously, this process leaves some facts out of the story. You must be sure that your story includes the most important information.

But for you to make that judgment, you have to learn everything possible about your subject, and that means you will end up knowing a lot of less-important facts that will never make it into a news story. A good reporter loves to dig into a story. The rule is: "Write 10 percent of what you know."

## THE FIVE 'W's'

Every news story must cover the "Five W's": Who, What, When, Where, Why and sometimes
