Capitalism Jürgen Kocka, Marcel van der Linden, 2016-08-25 Capitalism has been a controversial concept In the second half of the 20th century many historians have either not used the concept at all or only in passing Many regarded the term as too broad holistic and vague or too value loaded ideological and polemic This volume brings together leading scholars to explore why the term has recently experienced a comeback and assess how useful the term can be in application to social and economic history The contributors discuss whether and how the history of capitalism enables us to ask new questions further explore unexhausted sources and discover new connections between previously unrelated phenomena The chapters address case studies drawn from around the world giving attention to Europe Africa and beyond This is a timely reassessment of a crucial concept which will be of great interest to scholars and students of economic history

Banking, Trade and Industry Alice Teichova, Ginette Kurgan-van Hentenryk, Dieter Ziegler, 1997-05-15 An account of the rise of banking since the Middle Ages and its place in the modern

international economy first published in 1997 Luther H. Holton Henry Cornelius Klassen,2001 From the success of his various business ventures he moved easily into the world of politics Luther Holton was finance minister of the United Province of Canada from 1863 to 1864 leading the battle to reform the finance department and to enhance the province's credit in London England Planting the Seeds of Research Louis A. Ferleger,2020-01-31 Planting the Seeds of Research explores why by the beginning of the twentieth century the United States dominated agricultural production worldwide The thesis is that the ultimate investments made by the United States Department of Agriculture and State governments created the research structure that made American agriculture spectacularly successful The social commitment by business government and farmers built the productive capabilities that generated sustainable prosperity in American agriculture The ultimate investment in agriculture enabled Americans over time to spend less of their disposable income on food and more on other goods and services and compete in international agricultural markets **The Origins and Development of Financial Markets and Institutions** Jeremy Atack,Larry Neal,2009-03-16 Collectively mankind has never had it so good despite periodic economic crises of which the current sub prime crisis is merely the latest example Much of this success is attributable to the increasing efficiency of the world's financial institutions as finance has proved to be one of the most important causal factors in economic performance In a series of insightful essays financial and economic historians examine how financial innovations from the seventeenth century to the present have continually challenged established institutional arrangements forcing change and adaptation by governments financial intermediaries and financial markets Where these have been successful wealth creation and growth have followed When they failed growth slowed and sometimes economic decline has followed These essays illustrate the difficulties of coordinating financial innovations in order to sustain their benefits for the wider economy a theme that will be of interest to policy makers as well as economic historians A History of the Office and Office Work Rob Harris,2025-04-08 This book brings together the office and office working as an economic construct as a business function as a building type and as a mode of work It explores social and economic relations and it traces the evolution of work and the environment and equipment needed to support it over the last 400 years In so doing it helps to fill a void in popular understanding of the office The role of the office has been examined over the past three years in ways that it has never been examined before Whilst the existential crisis arising from COVID 19 has settled somewhat there remain big questions over the future of office workers and office real estate This book is a timely well researched and fascinating contribution to the debate Rob Harris explores how the nature of work has changed and continues to change placing the events surrounding COVID 19 into a longer term perspective and asking what is the future of the office Will it go through a radical reinvention How will office work evolve in the future Whither office buildings The book emphasises the continuum of change and that today's events are simply the latest stage of change rather than something entirely novel This book will be of interest to anyone with a stake in the built environment whether as an investor occupier owner manager or

advisor It is equally accessible to those with a non technical background including students on courses such as economic history economics geography real estate and urban planning
