2022 **The Evolution of the Japanese Developmental State** Hironori Sasada, 2013 The Japanese economy underwent a fundamental transition from a liberal economy to a developmental state system during World War II and despite efforts by the American occupation forces to dismantle them after 1945 these elements of the wartime economic system remained in place Through an historical institutionalist lens this book examines the reasons why the key features of the Japanese developmental state such as pilot agencies and industrial associations continued to play key roles in the post war Japanese economy Further it locates the fundamental roots of the developmental state system in wartime Manchuria and thus highlights how decisions made in the context of war continued to influence the direction of the Japanese economy over the following decades Analysing the institutional origin and evolutionary path of developmental state system The Evolution of the Japanese Developmental State extends existing scholarship on the institutions that were at the heart of the developmental state system by focusing on not just why they were important but also how and why they were originally built Based on extensive archival research in both Japan and the USA including Japanese language collections not widely known in the West it will be of great interest to students and scholars of political science economic history economics and Asian studies

Martial Arts and the Body Politic in Meiji Japan Denis Gainty, 2013-08-22 In 1895 the newly formed Greater Japan Martial Virtue Association Dainippon Butokukai held its first annual Martial Virtue Festival butokusai in the ancient capital of Kyoto The Festival marked the arrival of a new iteration of modern Japan as the Butokukai's efforts to define and popularise Japanese martial arts became an important medium through which the bodies of millions of Japanese citizens would experience draw on and even shape the Japanese nation and state This book shows how the notion and practice of Japanese martial arts in the late Meiji period brought Japanese bodies Japanese nationalisms and the Japanese state into sustained contact and dynamic engagement with one another Using a range of disciplinary approaches Denis Gainty shows how the metaphor of a national body and the cultural and historical meanings of martial arts were celebrated and appropriated by modern Japanese at all levels of society allowing them to participate powerfully in shaping the modern Japanese nation and state While recent works have cast modern Japanese and their bodies as subject to state domination and elite control this book argues that having a body being a body and through that body experiencing and shaping social political and even cosmic realities is an important and underexamined aspect of the late Meiji period *Martial Arts and the Body Politic in Meiji Japan* is an important contribution to debates in Japanese and Asian social sciences theories of the body and its role in modern historiography and related questions of power and agency by suggesting a new and dramatic role for human bodies in the shaping of modern states and societies As such it will be valuable to students and scholars of Japanese studies Japanese history modern nations and nationalisms and sport and leisure studies as well as those interested in the body more broadly *China and Japan in the Russian Imagination, 1685-1922* Susanna Soojung Lim, 2013 Throughout the centuries as Russia strove to build itself into an imperial power equal to those in the West China and Japan came to occupy a special place

in Russians view of the orient Never colonised by Russia or the West China and Japan were linked not only to the greatest of Russian imperial fantasies but also conversely to a deep sense of insecurity regarding Russia's place in the world a sense of insecurity which deepened as China and Japan began to modernise in the later nineteenth century Drawing on a wide range of works by Russian writers and thinkers Lim sets out how Russian perceptions of China and Japan were formed from Muscovy's first contacts with China in the late seventeenth century through to the aftermath of Russia's defeat by Japan in the early twentieth century

Japanese-German Relations, 1895-1945 Christian W Spang, Rolf-Harald Wippich, 2006-04-18 Written by a team of Japanese and German scholars this book presents an interpretation of Japanese German history and international diplomacy It provides a greater understanding of key aspects of the countries bilateral relations from the end of the Sino Japanese War in 1895 to the parallel defeat of Germany and Japan in 1945 New research is explored on the military as well as ideological interconnections between Japan and Germany in the closing years of the nineteenth century the First World War and the development of bacteriological warfare during the Second World War In addition the book's focus on the Second World War significantly reinterprets two familiar axes of Japanese German relations the impact of Nazi ideology on Japanese fascism and the Axis Alliance Drawing on German as well as Japanese archival sources the book presents a revealing examination of a crucial period in the modern history of Western Europe and East Asia As such it will be of huge interest to those studying the modern history of Japan Germany comparative and world history international relations and political science alike

Japanese Diplomacy in the 1950s Makoto Iokibe, Caroline Rose, Junko Tomaru, John Weste, 2008-02-19 This book provides a detailed examination of Japan's diplomatic relations in the 1950s an important decade in international affairs when new structures and systems emerged and when Japan established patterns in its international relationships which continue today It examines the process of Japan's attempts to rehabilitate itself and reintegrate into a changing world and the degree of

success to which Japan achieved its goals in the political economic and security spheres The book is divided into three parts each containing three chapters Part I looks at Japan in the eyes of the Anglo American powers Part II at Japanese efforts to gain membership of newly forming regional and international organizations and Part III considers the role of domestic factors in Japanese foreign policy making Important issues are considered including Japanese rearmament and the struggle to gain entry into the United Nations In contrast to much of the academic literature on post war Japanese diplomacy generally presenting Japan as a passive actor of little relevance or importance this book shows that Japan did not simply sit passively by but formed and attempted to instigate its own visions into the evolving regional and global structures It also shows that whilst Japan did not always figure as highly as its politicians and policy makers may have liked in the foreign policy considerations of other nation states many countries and organizations did attach a great deal of importance to rebuilding relations with Japan throughout this period of re adjustment and transformation
