Australia Reshaped 200 Years Of Institutional Transformation:

Australia Reshaped Geoffrey Brennan, Francis G. Castles, 2002-09-04 Australia Reshaped is the capstone volume in the Reshaping Australian Institutions series As the summation of all that has gone before this book is structurally and qualitatively different from the others Eight leading social scientists have been invited to write a major essay on a key element of Australian institutional life Each chapter has the length and depth of a major contribution acting as an overview of the field for both local readers and an international scholarly audience

Colonial Religion Bruce Kaye, 2020-04-01 This book contains a series of essays based on previously published articles but all revised and updated One on the founding of the university of Sydney has been totally re written They deal with the cultural and political tsunami that swept over the British empire and especially the colonies in Australia in the middle of the nineteenth century The effects on those changes continue to this day for both church and state The recent debates on marriage and religious freedom have about them the marks of these nineteenth century changes Not all is simple continuity State aid for independent schools initiated by Robert Menzies but carried to enormous lengths by his successors to this day actually turned the nineteenth century resolution totally on its head The issues in these essays turn of the collapse of the English Christendom version of church state relations The implications of that long running change are still central to the stuttering re thinking by Anglicans of what it means to be a church in Australia in the twenty first century That struggle has its analogues in the broader culture and nation as it tries to find a way to be Australia

Commercial and Economic Law in Australia Dr Lynden Griggs, Prof. George Cho, John McLaren, James Scheibner, 2018-11-30 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of the law covering merchants status and obligations including the laws governing state intervention in economic activities in Australia provides quick and easy guidance on such commercial and economic matters as business assets negotiable instruments commercial securities and regulation of the conditions of commercial transactions Lawyers who handle transnational business will appreciate the explanation of local variations in terminology and the distinctive concepts that determine practice and procedure Starting with a general description of the specifically applicable concepts and sources of commercial law the book goes on to discuss such factors as obligations of economic operators and institutions goodwill broker client relations commercial property rights and bankruptcy Discussion of economic law covers the laws governing establishment supervision of economic activities competition law and government taxation incentives These details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance Thorough yet practical this convenient volume is a valuable tool for business executives and their legal counsel with international interests Lawyers representing parties with interests in Australia will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative commercial and economic law
