1997 Ieee First Workshop On Multimedia Signal Processing:

Multimedia Signal Processing, 1997., IEEE First Workshop on, 1997 *Academic Press Library in Signal Processing*
David Bull, Min Wu, 2014-06-12 This fifth volume edited and authored by world leading experts gives a review of the principles methods and techniques of important and emerging research topics and technologies in image and video compression and multimedia With this reference source you will Quickly grasp a new area of research Understand the underlying principles of a topic and its application Ascertain how a topic relates to other areas and learn of the research issues yet to be resolved Quick tutorial reviews of important and emerging topics of research in Image and Video Compression and Multimedia Comprehensive references to journal articles and other literature on which to build further more specific and detailed knowledge Edited by leading people in the field who through their reputation have been able to commission experts to write on a particular topic *Proceedings of the First International Conference on Computational Intelligence and Informatics* Suresh Chandra Satapathy, V. Kamakshi Prasad, B. Padmaja Rani, Siba K. Udgata, K. Srujan Raju, 2016-11-26 The book covers a variety of topics which include data mining and data warehousing high performance computing parallel and distributed computing computational intelligence soft computing big data cloud computing grid computing cognitive computing image processing computer networks wireless networks social networks wireless sensor networks information and network security web security internet of things bioinformatics and geoinformatics The book is a collection of best papers submitted in the First International Conference on Computational Intelligence and Informatics ICCII 2016 held during 28-30 May 2016 at JNTUH CEH Hyderabad India It was hosted by Department of Computer Science and Engineering JNTUH College of Engineering in association with Division V Education Research CSI India **Multimedia Image and Video Processing** Ling Guan, Sun-Yuan Kung, Jan Larsen, 2000-08-23 Multimedia stands as one of the most challenging and exciting aspects of the information era Although there are books available that deal with various facets of multimedia the field has urgently needed a comprehensive look at recent developments in the systems processing and applications of image and video data in a multimedia environment Image and Video Databases: Restoration, Watermarking and Retrieval A. Hanjalic, G.C. Langelaar, P.M.B. van Roosmalen, J. Biemond, R.L. Lagendijk, 2000-06-14 This book provides an in depth treatment of the three important topics related to image and video databases restoration watermarking and retrieval It is the result of the participation of the Delft University of Technology in the European Union ACTS program a pre competitive R D program on Advanced Communications Technologies and Services 1994-1998 In particular the book has benefited from participation in the AURORA and SMASH projects respectively automated film and video restoration and storage for multimedia systems watermarking retrieval Multimedia Data Hiding Min Wu, Bede Liu, 2013-03-19 The digital information revolution has brought about profound changes in our society and our life New devices and powerful software have made it possible for consumers worldwide to create manipulate share and enjoy the

multimedia information Internet and wireless networks offer ubiquitous channels to deliver and to exchange multimedia information for such purposes as remote collaboration distant learning and entertainment With all these advances in multimedia coding and communication technologies over the past decade the major hurdle for allowing much broader access of multimedia assets and deployment of multimedia services no longer lies with bandwidth related issues but with how to make sure that content is used for its intended purpose by its intended recipients The core issue then becomes the development of secure management of content usage and delivery across communication networks Data hiding and digital watermarking are promising new technologies for multimedia information protection and rights management Secondary data can be embedded imperceptibly in digital multimedia signals for a variety of applications including ownership protection authentication access control and annotation Data hiding can also be used to send side information in multimedia communication for providing additional functionalities or for enhancing performance The extraction of the embedded data may not need knowledge of the original host media data In addition to imperceptibility robustness against moderate processing such as compression is also an important consideration

Mobile Ad-hoc and Sensor Networks Jiannong Cao, 2006-11-27 This book constitutes the refereed proceedings of the Second International Conference on Mobile Ad hoc and Sensor Networks MSN 2006 held in Hong Kong China in December 2006 The 73 revised full papers address all current issues in mobile ad hoc and sensor networks and are organized in topical sections on routing network protocols security energy efficiency data processing and deployment

Advanced Computational Techniques for Sustainable Computing Megha Rathi, Adwitiya Sinha, 2022-07-25 Advanced Computational Techniques for Sustainable Computing is considered a multidisciplinary field encompassing advanced computational techniques across several domains including Computer Science Statistical Computation and Electronics Engineering The core idea of sustainable computing is to deploy algorithms models policies and protocols to improve energy efficiency and management of resources enhancing ecological balance biological sustenance and other services on societal contexts The book offers a comprehensive coverage of some of the most essential topics It provides an insight on building smart sustainable solutions Includes details of applying mining learning IOT and sensor based techniques for sustainable computing Entails data extraction from various sources followed with pre processing of data and how to make effective use of extracted data for application based research Involves practical usage of data analytic language including R Python etc for improving sustainable services offered by multidisciplinary domains Encompasses comparison and analysis of recent technologies and trends Includes development of smart models for information gain and effective decision making with visualization The readers would get acquainted with the utilization of massive data sets for intelligent mining and processing It includes the integration of data mining techniques for effective decision making in the social economic and global environmental domains to achieve sustainability The implementation of computational frameworks can be accomplished using open source software for the building of resource efficient models The

content of the book demonstrates the usage of data science and the internet of things for the advent of smart and realistic solutions for attaining sustainability Fundamentals of Media Security WeiQi Yan,Jonathan Weir,2010 *American Book Publishing Record Cumulative 1998* R R Bowker Publishing,1999-03
