Build Your Own Saturn V The World On The Move:

The Space Shuttle Decision T. A. Heppenheimer, 1999 **Building Moonships** Joshua Stoff, 2004 In 1961 after the United States had acquired a total of fifteen minutes of spaceflight experience President John F Kennedy announced his plans for landing a man on the moon by 1970 The space race had begun In 1962 after a strenuous competition the National Aeronautics and Space Administration NASA announced that the Grumman Aircraft Engineering Corporation of Bethpage Long Island had won the contract to build the lunar module the spacecraft that would take Americans to the moon This was the first and the only vehicle designed to take humans from one world to another Although much has been written about the first men to set foot on the moon those first hesitant steps would not have been possible without the efforts of the designers and technicians assigned to Project Apollo Building Moonships The Grumman Lunar Module tells the story of the people who built and tested the lunar modules that were deployed on missions as well as the modules that never saw the light of day This is the first publication to chronicle the visual history of the design construction and launch of the lunar module one of the most historic machines in all of human history **Congressional Record** United States. Congress, 2000 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 *The Spacefaring Earth* Michael G. Smith, 2024-12-04 This engaging survey of the Space Age links science and technology with politics and popular culture war and peace and crises and controversies It examines the history of spaceflight as a mirror of human thought and action across the Earth The volume encompasses the new astronomy and sciences of the modern era the early dreamers and pioneers after 1903 the national competitions of the First World War the rocket states that prepared for the Second World War the rivalries and space race of the Cold War between the US and USSR as well as more recent developments including the Space Shuttle the International Space Station national space programs orbital technologies transhumanism and military and commercial ventures in space It also stresses the importance of geography in the geopolitics of spaceflight competition and in the nature of the planetary biosphere Taking a chronological approach to lived human experience and threshold achievements the chapters show how these themes have been reflected in literature art music film and our new digital worlds This book is essential reading for students of the history of the Space Age as well as an excellent companion to courses on twentieth century science and technology the Cold War and American history Independent Offices and Department of Housing and Urban Development Appropriations for 1969 United States. Congress. House. Committee on Appropriations. Subcommittee on Independent Offices and Department of Housing and Urban Development, 1968 NASA at 50 Rebecca Wright, Sandra Johnson, Steven J. Dick, United States. NASA History Program Office, 2010 These interviews capture reflections from top decision makers as the space agency was

completing its first 50 years Based on oral histories the book offers insights from those responsible for moving NASA through a deep transition from the end of the Space Shuttle Program the centerpiece of human spaceflight for three decades to the goals of the new policy known as the Vision for Space Exploration **Ultra-Large Aircraft, 1940-1970** William Patrick Dean,2018-04-24 In 1962 a unique transport aircraft was built from the parts of 27 Boeing B 377 airliners to provide NASA a means of transporting rocket boosters With an interior the size of a gymnasium The Pregnant Guppy was the first of six enormous cargo planes built by Aero Spacelines and two built by Union de Transport Aeriens More than half a century later the last Super Guppy is still in active service with NASA and the design concept has been applied to next generation transports This comprehensive history of expanded fuselage aircraft begins in the 1940s with the military's need for a long range transport The author examines the development of competing designs by Boeing Convair and Douglas and the many challenges and catastrophic failures Behind the scenes maneuvers of financiers corporate raiders mobsters and other nefarious characters provide an inside look at aviation development from the drawing board to the scrap yard

Abandoned in Place Roland Miller,2016-03 Roland Miller's color photographs document the NASA Air Force and Army facilities across the nation that once played a crucial role in the space race Popular Mechanics ,1994-07 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it's practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **Apollo in Perspective** Jonathan Allday,2019-07-15 Choice Highly Recommended Title January 2020 This special edition of Apollo in Perspective marks the 50th anniversary of the Apollo 11 Moon landing in 1969 Updated and revised throughout it takes a retrospective look at the Apollo space program and the technology that was used to land a man on the Moon In addition there is a new chapter looking forward to the future of contemporary spaceflight in returning to the Moon project Artemis and going on to Mars Using simple illustrations and school level mathematics it explains the basic physics and technology of spaceflight from how rockets work to the dynamics of orbits and how to simulate gravity in a rotating spacecraft A mathematical appendix shows how some of the formulas can be derived This is an excellent introduction to astronautics for anyone interested in space and spaceflight Features Accessible written in a friendly and informal style Contains real world examples Updated throughout with new chapters on the Apollo missions and the immediate future of human spaceflight From the Foreword I am sure there is a woman or a man alive today who will land on the Moon and on Mars This book will certainly help them be ready for such a journey Most importantly it explains not only what happened 50 years ago but how the Apollo missions happened and the science that is required to do it again or to go further to Mars If the reader is younger still in school and perhaps considering the sciences this book will introduce ideas that will help you choose the subjects to study which can help you to make your space travel a reality For others the book will be an exciting and thought provoking read that gives a vision of the near future in space

which all of us on planet Earth will be able to enjoy as the adventure unfolds Michael Foale CBE former NASA astronaut
