Building For Tomorrow International Experience In Construction Industry Development:

Building for Tomorrow Derek Miles, Richard Neale, 1991 A handbook of ideas methods and techniques aimed at assisting pioneering institutions to develop the construction industry in their countries Based on four case studies of successful institution building this book discusses the numerous problems that have been faced and overcome *Corporate Social Responsibility in the Construction Industry* Michael Murray, Andrew Dainty, 2013-01-11 The construction process right through from planning and design to use and demolition has a major impact on society Traditionally concern has been focused on its environmental impact and the quest for sustainability but this has now extended into the wider remit of Corporate Social Responsibility CSR Essentially this means that businesses must act voluntarily in a socially ethical manner by developing a policy that encompasses the core principles enshrined by CSR A unique presentation on a topic of emerging importance Corporate Social Responsibility in the Construction Industry is essential reading for all built environment undergraduate and post graduate courses as well as CEOs and senior managers within construction businesses who may be about to embark on developing a CSR strategy Infrastructure Investments in Developing Economies Giang Dang, Low Sui Pheng, 2014-10-18 This book aims to provide knowledge on how infrastructure is planned and built in a typical developing country and what key variables are there in the system limiting the efficient use of public investments in infrastructure The book begins with a comprehensive literature review on construction and economic development and trade and economic development The focus of the book is on the case of Vietnam with lessons drawn for other developing economies The book employs the mixed use of data to provide a stronger basis for analysis and interpretation of related government policies Based on the research findings the book recommends significant capacity building work for Vietnam to develop capacities that would remove constraints on the efficient use of public investments in infrastructure The general principles of significant capacity building work which are useful for policy implications are introduced in the book Analysts academics public and private communities in developing countries can adopt the research findings as guiding principles to bring about changes in their current use of public investments in infrastructure thus supporting their trade and economic growth in the long term Policies and Measures for Small-contractor Development in the Construction Industry, 1996 **International Project Marketing** Derek Miles, 1995 **Site Management** Claes-Axel Andersson, 1996 An important starting point in considering the technical aspects of planning and site management is the wide choice of possible technologies which is one of the special features of the construction industry This handbook illustrates the management of construction projects with worked examples and test planning skills with exercises in management practice *New Perspectives on Construction in Developing Countries* George Ofori, 2012-06-26 Developing countries face the challenge of maintaining economic growth and socio economic development at the core of which sits the construction industry Considerable research on construction in developing countries took place in the 1970 s and 1980 s but little since a gap which this book fills Including contributions

from prominent academics and practitioners in Australia China the Netherlands Portugal Singapore South Africa Switzerland and the UK this is a truly international analysis of a subject of global interest The most insightful and relevant of recent research on topics such as Millennium Development Goals the informal construction sector human resource development technology finance and social change are all addressed in the context of the construction industry in the developing world Also considered are other key aspects of construction industry development such as institution building nurturing of contractors and consultants and championing of industry development programmes While the challenge has grown and the needs have become even more pressing the research to date has rarely presented effective solutions Focussing on those aspects of the construction industry most crucial to development this is a much needed up to date study that sheds new light on a variety of concepts and issues This is essential reading for researchers professionals and students interested in the construction industry in developing countries Readers of this book will be interested in its companion volume Contemporary Issues of Construction in Developing Countries

10th Symposium Construction Innovation and Global Competitiveness Ben Obinero Uwakwe, Isaam A. Minkarah, 2002-09-23 This two volume set comprises the proceedings of the 2002 symposium concerned with innovation in the construction industry and global competition Approximately 115 papers address topics ranging from business improvement to the impact of innovation on the built environment and globalization and competitiveness

Modern Construction Bruno de Carvalho Matos, 2025-11-01 This book offers a comprehensive and integrated view of the global construction sector using language that is accessible to all interested readers It explores the historical evolution of construction the political economic social and technological challenges the sector faces and proposes strategic measures to promote growth and strengthen resilience The life cycle of construction projects is examined with particular emphasis on project management with reference to widely recognized regulations and standards It also features opinion pieces by the author on contemporary issues and emerging trends in the sector followed by an analysis of risks and opportunities as well as guidelines for managing organizational change The book concludes by highlighting the value of construction to humanity emphasizing its tangible contributions to housing infrastructure and employment Construction is presented not only as an economic driver but also as a fundamental pillar in the long term development of societies

Business Management Claes-Axel Andersson, Derek Miles, John Ward, 1996
