Burmese understandings of notions such as democracy and political participation the book provides readers with a conceptual framework for understanding some of the key dynamics of Myanmar's ongoing political transition. Some of these ideas help to shed light on restrictive or exclusionary political impulses such as anti-Muslim Buddhist nationalism or scepticism towards the ability of the masses to participate in politics. Cultural Politics and Asian Values Michael D. Barr, 2012-11-12 Cultural Politics and Asian Values looks at the political, cultural and religious background of East and Southeast Asian societies and those of the West with a view to seeing how they are affecting contemporary national and international politics, democratization, the international human rights discourse, NGOs and globalization. The book surveys the political history and pre-history of the Asian values debate taking it up to the era of Megawati Sukarnoputri, Chen Shui-bian and Kim Dae-jung. In chapters on Confucianism, Buddhism, Islam, Christianity and liberalism, Barr explores the histories and conceptual essences of the world religions involved in or affected by the debate.

Rural Life in Late Socialism, 2023-08-28 China, Laos and Vietnam are three of a handful of late socialist countries where capitalist economics rubs up against party-state politics. In these countries, sweeping processes of change open up new vistas of opportunity and imaginaries of the future alongside much uncertainty and anxiety, especially for their large rural populations. Contributors to this edited volume demonstrate the diverse ways in which rural people build futures in this unique policy landscape and how their aspirations and desires are articulated as projects involving both citizens and the state. This produces a politics of development that happens through and around the state as people navigate discourses of betterment to imagine and make new futures at individual and collective levels.

The Oxford Handbook of Peaceful Change in International Relations T. V. Paul, Deborah Welch Larson, Harold A. Trinkunas, Anders Wivel, Ralf Emmers, 2021 Abstract With the rapid rise of China and the relative decline of the United States, the topic of power transition conflicts is back in popular and scholarly attention. The discipline of International Relations offers much on why violent power transition conflicts occur, yet very few substantive treatments exist on why and how peaceful changes happen in world politics. This Handbook is the first comprehensive treatment of the subject of peaceful change in International Relations. It contains some 41 chapters, all written by scholars from different theoretical and conceptual backgrounds, examining the multi-faceted dimensions of this subject. In the first part, key conceptual and definitional clarifications are offered, and in the second part, papers address the historical origins of peaceful change as an International Relations subject matter during the Inter War, Cold War and Post Cold War eras. In the third part, each of the IR theoretical traditions and paradigms in particular, Realism, liberalism, constructivism and critical perspectives, and their distinct views on peaceful change are analyzed. In the fourth part, papers tackle the key material, ideational and social sources of change. In the fifth part, the papers explore selected great and middle powers and their foreign policy contributions to peaceful change, realizing that

many of these states have violent past or tend not to pursue peaceful policies consistently In part six the contributors evaluate the peaceful change that occurred in the world s key regions In the final part the editors address prospective research agenda and trajectories on this important subject matter Keywords Peaceful Change War Security International Relations Theory Sources of Change Systemic Theory Realism Liberalism Constructivism Critical Theories **Politics and Culture in the Developing World** Richard J. Payne, Jamal R. Nassar, 2015-10-15 From decolonization and democratization to religion and gender Politics and Culture in the Developing World is a comprehensive survey of the global context of development With in depth and current examples from Asia Africa Latin America and the Middle East this text examines the central political themes in the developing world Throughout Politics and Culture in the Developing World demonstrates how globalization both accelerates change and increases interdependence between developing and developed countries

Punks, Monks and Politics Julian C H Lee, Marco Ferrarese, 2016-11-23 Authenticity is much sought after being described as inauthentic is an insult or an embarrassment Being authentic suggests that a given behaviour or performance is reflective of a trueness or genuineness to one s identity From a social science perspective there is sometimes scepticism expressed about the historical faithfulness of purported behaviours such as when something is referred to as an invented tradition However what can be overlooked in such criticisms is an array of sociological and existential dynamics that are at play when authenticity is striven for Likewise able to be overlooked is where the location of that authenticity is ostensibly founded sometimes the trueness of the behaviour is located in local traditions that reach back into time immemorial sometimes in a universal human and shared sameness and sometimes with regard to a global phenomenon Punks Monks and Politics explores the idea of authenticity as enacted in Thailand Indonesia and Malaysia The collective contributions reveal the sometimes contradictory ways in which the dynamics of authenticity its pursuit its deployment its politics play out in very different contexts Whether authenticity inheres in the local or the global amongst the majority or within a subculture on the outside of or within people or in the past or the present authenticity is nevertheless valued
