Martin,2024-04-23 This book examines personal and professional understandings of religion in psychotherapy and advocates for integrity competency and cultural pluralism in clinical practice A major feature of this book is that it confirms the massive proliferation of religion oriented approaches to counseling and therapy in recent years It attributes this rise to opportunism and exaggerated individualism among therapists and to the frequent failures of professional associations clinical preparation programs and other influences In response to these influences it identifies the need for guiding principles for integrating religion into therapy discusses the religious issues that clients bring to therapy and advocates for major changes in clinical practice with emphasis on integrity and competence Building on a large volume of research and using evidence based conclusions it clarifies how these two major features of contemporary life can be integrated with integrity and competence The author maintains that religion should be a feature of the practice of counseling and therapy so long as it addresses the clinically relevant needs of clients However it also explores how the religion of counselors and therapists often expresses the needs of counselors and therapists instead of addressing the needs of their clients In the context of these questions and discussion of contentious challenges this book provides guidelines for relating religion with clinical practice and recommends needed actions by clinical preparation programs professional associations individual therapists state legislatures licensing boards social service agencies and corporations All of this stands on the conspicuous need for professional accountability in the delivery of mental health care **Counseling Theory** Richard D. Parsons,Naijian Zhang,2014-01-16 Organized around the latest CACREP standards *Counseling Theory Guiding Reflective Practice* by Richard D Parsons and Naijian Zhang presents theory as an essential component to both counselor identity formation and professional practice Drawing on the contributions of current practitioners the text uses both classical and cutting edge theoretical models of change as lenses for processing client information and developing case conceptualizations and intervention plans Each chapter provides a snapshot of a particular theory approach and the major thinkers associated with each theory as well as case illustrations and guided practice exercises to help readers internalize the content presented and apply it to their own development as counselors **To Heal a Wounded Heart** Pilar Jennings,2017-12-12 Early on in her clinical practice psychoanalyst Pilar Jennings was presented with a particularly difficult case a six year old girl who traumatized by loss had stopped speaking

Challenged by the limitations of her training to respond effectively to the isolating effect of childhood trauma Jennings takes the unconventional path of inviting her friend Lama Pema a kindly Tibetan Buddhist monk who experienced his own life shaping trauma at a very young age into their sessions In the warm therapeutic space they create the young girl slowly begins to heal The result is a fascinating case study of the intersection of Western psychology and Buddhist teachings Pilar s story is for therapists parents Buddhists or any of us who hold out the hope that even the deepest childhood wounds can be the portal to our capacity to love and be loved Nelson-Jones' Theory and Practice of Counselling and Psychotherapy
